

Chickamauga Elementary School

Dear Parents,

In order to be in compliance with the Georgia state law, we need the following papers from your kindergarten student. They also need to be completed correctly. Before entering kindergarten, each student must have:

1) Certificate of Vision, Hearing, Dental and Nutrition (form 3300)

This form must be dated and signed, along with the doctor or clinic's name, address and phone number.

2) Certificate of Immunization (form 3231)

This form must be completed correctly with a signature, address and phone number of the clinic or Physician that completed the form.

The immunizations required for kindergarten are:

5 DTP, 3 Hepatitis B, 2 Hepatitis A, 4 IPV, 2 MMR, 2 Varicella (chicken pox).

If you do not get immunizations for your child, you must go to the Georgia Department of Public Health and print out the Affidavit of Religious Objection to Immunizations, have it signed and dated properly and notarized. If you have shot records from another state, you must have them transferred over to the Georgia form. Your doctor or local health department should be able to do this for you. The state comes shortly after school starts and checks each student record. Each student has 30 school days to have the correct paperwork turned in to the school. If the correct paperwork is not turned in by then, the student will not be allowed in class, and the school could be fined until it is corrected. If you have any questions, feel free to contact me at 382-3100 ext. 1006.
