Schools in need of software or MIS providers can use this brochure to browse trusted BSME Partners. To have a look at our other Partner categories, please visit our [website](#).

Services Software and Management Information Systems

Applicaa Ltd

www.applicaa.com | [LinkedIn](#)

Applicaa is a software company that focuses on SaaS (software as a service) cloud-based software products that specialise in school application and bursary management. The business was founded in 2016 by two teachers from London who devised a digital method for maximising student enrolment.

Admissions+ is serving over 1000 schools & colleges, mostly in the UK but some in the Middle East. It enables web-based enrolment from enquiry to acceptance using a fully digitised process, removing the need for parents to complete paper forms. Admissions+ is platform-independent and it seamlessly integrates with a range of market-leading MISs, including full technical integration with SIMS and iSAMS.

Bursary+ was developed for the independent school market and was piloted and tested by the GDST. This product digitally manages bursary applications and uses financial modelling to assess a family's application using their income, expenditure, assets, and liabilities to indicate eligibility for a bursary.

The system is a complete CRM solution with functionality to enable communication with parents from within the platform that shows delivery rates, open rates, link clicks rates and allows you to prepare and schedule emails to individuals or groups of students which you can set up with ease. You can also book meetings or school events online and the Applicaa CRM enhances school marketing efforts in that it provides a delightful first experience for prospective families looking to join your school.

Our system works for all age groups from Nursery to Sixth Form and it used by some of the best known independent schools in the UK.

BlueSky Education

www.blueskyeducation.co.uk | contact@blueskyeducation.co.uk

BlueSky Education's award-winning platform helps school leaders to strengthen appraisal and performance reviews processes, and gain a deeper understanding of the impact of continued professional development on classroom practice and school improvement. Linking school quality assurance with holistic intelligence tools allows leaders to easily evaluate progress, while staff are engaged through a rich, ongoing professional dialogue. BlueSky Education allows schools to design a tailored approach to teacher appraisal that aligns with the culture of the organisation, whether the school uses annual performance reviews or a continuous professional dialogue throughout the cycle. Our flexible platform encourages staff to align their own professional objectives to school and trust priorities and helps to create an open and continuous dialogue with their coach or manager. BlueSky is used by thousands of schools, trusts and groups around the world. It is the leading online solution of its kind – and has previously won top awards including a Bett Award for Leadership and Management.

BSME Services Software and Management Information Systems

iSAMS Ltd

www.isams.com | [LinkedIn](#)

iSAMS was the first school administration management information system (MIS) to be entirely web-based. Its clever design combines a single database and suite of portals and apps to give you bespoke management of all academic, pastoral and administrative information. This intuitive system — also accessible on mobile devices — is perfect for everyone at your school. From data administrators and staff to students and parents, it brings together the whole school community. Our experienced and dedicated Development team is constantly developing and enhancing the MIS with its extensive portfolio of integrated modules and online portals. This allows our schools to streamline and enhance their information management while they focus on delivering excellence for their pupils. We are proud that over half a million users worldwide - including teachers, parents, pupils, data administrators and school staff - use iSAMS every day to benefit their unique data needs. Originally created by our two co-founders for Rugby School whilst studying there as sixth-form pupils, iSAMS is now used by over 750 schools worldwide including a number of schools in the Middle East. Some of these include Brighton College Abu Dhabi, Sherborne Qatar, Cranleigh School Abu Dhabi, British International School Abu Dhabi, Doha British School, Dubai British School, Jebel Ali School, Ras Al Khaimah Academy and New English School Kuwait as well as other highly acclaimed schools across the world.

Education Horizons

www.educationhorizons.com/solutions/engage/ | [LinkedIn](#)

Our accomplished Engage School Management Information System (SMIS) is designed for the needs of independent and international schools.

Expansive functionality including admissions, marketing, academic, pastoral and financial is centralised making it simpler and intuitive for parents and teachers, while driving management at a school or group level. Engage features unique and versatile Workflows and Forms, Tracked Communications, school specific terminology and per-user language. Engage is well-connected via API to an enormous range of school products; without question the most extensive single suite system available.

Hugely experienced and personable staff help assist the change management process to ensure you get the benefits and outcomes you expect.

Engage - Your School Community Ecosystem.

SOCS

www.socs.tech | mirka@socs.tech

SOCS transforms co-curricular management for the best school experience. An intuitive modular software programme that fully integrates with your existing tech to turbo charge your activities.

The trusted partner with over 1,000 of the world's leading schools across the globe, SOCS has been collaborating with 136 schools based in the Middle East since 2013 to develop a suite of best-in-class modules to give you unparalleled control over your full co-curricular programme.

We understand your need to get excellent value for money and streamline processes to save admin and precious manpower. SOCS provides an intuitive interface which requires minimum set-up and training, and integrates seamlessly with your existing MIS/SIS, VLEs and portals to give real-time updates for parents, pupils and staff.

We can help your team manage registrations, safeguarding, sports fixtures and coaching, music, tuition, calendars, transport and billing like never before. Each SOCS module has a reporting function so you can rest easy that you know where your pupils are from dawn to dusk. Using SOCS, you can demonstrate that you have the complete overview on each pupil's engagement and development within your co-curricular programme.

The SOCS platform can handle the details and gives a layer of control and transparency which takes the stress out of the process. From avoiding lesson clashes, to using an algorithm to allocate places for over-subscribed activities. From harmonising calendar entries to then communicating effectively to everyone within your school community online, via digital boards, or even formatted for print.

Let SOCS empower your team to deliver an exceptional co-curricular experience. Find out more about our new integrated co-curricular packages, including the launch of our facilities function across our suite of modules and our new SOCS Trips module planned for the 2024/25 school year.
