LET’S BEGIN!

RELAX & ALLOW.
Constant self monitoring will get in the way of group performance. Let go…

DON'T WORRY ABOUT WHO GETS CREDIT.
When everyone genuinely collaborates, everyone ends up being more creative.

CLARITY IS NOT A VIRTUE.
If everything you say is detailed and explicit, you won't give your collaborators room to run. Put ideas out there that are half-baked.

CREATIVITY IS RISKY.
Nurture an environment that rewards failure. Successful creative teams are the ones who fail the most often.

Guiding Principles

What do we feel passionate about?

PROJECT GUIDING PRINCIPLES – FUTURE VISION

1. Describes an end result – not a process.
2. It is a desire – not an obligation.
3. Be specific, state the obvious. It must be capable of being visualized.
4. It is not avoiding or ridding yourself of anything unwanted. It's providing a positive outlook.
5. It is not limited to what you think is possible.
6. It is written in the present tense.
7. It should focus on good work not standings or recognition.

The purpose of the guiding principles is to **guide** the project design, help **set priorities**, **align resources**, and facilitate an **efficient decision-making** process.

PROJECT GUIDING PRINCIPLES – FUTURE VISION

Imagine Boulder TEC is successful beyond your highest expectations, and you're giving a campus tour in the year 2030...

WHAT DO WE SEE?

PROJECT GUIDING PRINCIPLES – THEMES

3. Dynamic and flexible / visible learning
4. Sense of community / collaboration
5. Connection to outdoors / natural light / vibrant
6. A cohesive, welcoming campus for all

Boulder TEC is committed to…

What are the essentials?
