

HOMEWORK

The board of directors believe that homework can enhance classroom learning. It should serve one of four purposes as outlined in procedure 2423, pre-learning, comprehension, practice or for enrichment of previously learned material.

Teachers will cooperate with reasonable requests of parents who ask for homework that complies with the four purposes listed above. Teachers will support parents and provide them resources and suggestions for helping pupils at home. It is the teacher's responsibility to determine the type, and amount of homework that will benefit individuals.
