# TWICE THE DISCOVERIES, TWICE THE FUN!

At Camp Invention®, we bring hands-on STEM experiences to children across the country. This summer, double up with TWO WEEKS designed to spark creativity and build confidence as campers bring their brightest ideas to life.

## WEEK 1:

### ILLUMINATE

Young innovators will:

- Team up to investigate the science of sports ball design and personalize a light-up board game
- Customize a Glow Box while discovering the science of illuminating inventions and glowing animals
- Embark on an epic adventure to solve real-world water challenges around the planet
- Transform their big ideas from initial sketches to working prototypes using everyday items

## WEEK 2:

### RECHARGE

Young innovators will:

- Find their voice and discover sound waves in action as they reverse engineer a wireless microphone
- Experiment with circuitry and energy as they create solar-powered crickets and build custom habitats
- Design vehicles that can travel across land and add prototype ideas to make it morph for air and water
- Explore fascinating physics when they create a device to launch rubber ducks across the world

### JOIN YOUR FRIENDS AT CAMP INVENTION!
