

Social Thinking Academy

Can Social Thinking Academy Help My Child?

Social Thinking Academy at The King's Academy is available to students in K-8th grade. Using *Social Thinking*® methodology, the academy is designed to help students better connect with others and live happier, more meaningful lives. Our Speech and Language Pathologist, April Jamason, M.S. CCC-SLP, collaborates with teachers, parents and educational personnel regarding ways to support students' social thinking skills at school and home.

Social Thinking® methodology uses fun and motivating ways to teach students with and without diagnoses. A student may be referred based on teacher/parent observation, or educational report recommendations.

The overall goals of this methodology is to foster the development of:

- social self-awareness
- perspective taking/theory of mind
- self-regulation
- executive functioning
- social-emotional understanding
- social skills
- organizational systems
- reading comprehension
- written expression

If you would like more information regarding Social Thinking Academy, please contact Mrs. Jamason at ajamason@tka.net or 561-686-4244, ext. 391. The fee for therapy is \$65 per session and billed through the business office.
