

Descriptor Term: ORGANIZATION CHARTS

Descriptor Code: GAEA

Rescinds: CC

Board Approved: 6/26/2006

Previously Approved: 4/18/1988

The legal authority of the Board of Trustees is to be conveyed through the Superintendent by the organizational charts for the Gulfport School District.

The effective operation of schools in the District requires an organizational structure, effective administrative leadership at every level of responsibility, decision-making at the point in the structure where the decision can most effectively be made, and communication between individuals affected by decisions made. It is the function of leadership at every level to examine relevant facts and alternatives and to involve appropriate individuals in the process of reaching a decision. It is the responsibility of leadership to develop ways and measures that provide for effective communication. Once a decision has been made, it is the function of administration and of persons affected by such decisions, not only to follow through to assure implementation but also to evaluate continuously these decisions and to recommend revisions they think should be made.
