The use of resource persons as volunteers in the classroom can be an invaluable educational instrument. The Board of Trustees believes that volunteers can make many valuable contributions to our schools. The Board endorses a Volunteer Program in the schools subject to regulations and safeguards. The professional staff will locate and contact people in various areas of interest and expertise to serve as resource persons for particular units of study, as needed. All requests to use such resource persons will be cleared with the principal of the school. Suitable recognition of volunteer services will be made annually.
