## Market Recap

There was no FOMC meeting in August, but the question driving the markets was whether or not Fed officials had completed their tightening campaign. The annual rate of inflation had steadily retreated for 13 consecutive months, and there seemed to be scattered signs of a weakening economy. However, the July employment report, the first major data point released in August was far from weak. Although payroll growth slowed, the unemployment rate unexpectedly fell from 3.6% to 3.5%, within a fraction of a 53-year low. At the same time, average hourly earnings increased by +0.4% for the second straight month while annual wage growth held steady at +4.4%. Both exceeded forecasts.

The headline consumer price index (CPI) as well as core CPI both climbed +0.2% for the month, equaling forecasts. Energy prices were up just +0.1%, food prices rose +0.2%, and the cost for new and used vehicles fell. On a year-over-year basis, headline CPI actually rose from +3.0% to +3.2%, although an increase was widely expected and due entirely to the fact that 12 months earlier, inflationary pressure had receded. This relative “base effect” will also put significant upward pressure on the annual rate of inflation in the next CPI report. Core CPI slipped from +4.8% to +4.7% but remains well above the Fed’s +2.0% target. All-in-all, it was clear that the inflation battle wouldn’t end until consumer demand faded, and the July retail sales report suggested spending might actually be gaining strength. Retail sales unexpectedly climbed +0.7% in July, well above the median forecast of +0.4%, while the June increase was revised upward from +0.2% to +0.3%. The retail sales “control group,” which excludes autos, gas, building materials and food services (and feeds directly into the quarterly GDP calculation) rose +1.0%, *doubling the median forecast*. On a three-month annualized basis, overall retail sales were suddenly increasing at a +4.5% annual pace. In June, the three-month annualized rate of sales had slowed to +0.6%, which at the time suggested a weakening trend entering the new quarter. This surprising turn pushed early measures of Q3 GDP growth above 5%. Few economists believe the unexpected growth surge will continue, but Fed officials couldn’t deny the resiliency.

Fed Chairman Jay Powell had the opportunity to address monetary policy at the Fed’s

annual economic symposium in Jackson Hole Wyoming in late August. Powell began his keynote speech with a strong message on the Fed’s continued inflation fight. He clearly stated that inflation remains too high, and that the committee was “prepared to raise rates further if appropriate,” and more importantly, “intend to hold policy at a restrictive level until we are confident that inflation is moving sustainably down toward our (2%) objective.” In the weeks leading up to the Jackson Hole gathering, a number of analysts, including Nobel Prize winning economist Paul Krugman, had suggested the Fed should raise its 2.0% long term inflation target to 3.0%. In his speech, Powell completely dismissed that idea, saying “two percent is, and will remain, our inflation target.” This might have been the most important point he made. The takeaway was that the Fed might be done raising rates, but inflation remains a long way from its +2.0% target which implies the Fed will be in no hurry to cut rates in 2024.

The month of August ended with the futures market indicating the Fed had made its last rate hike in July and would remain on hold, while cuts were unlikely before next spring. Of course, the economy is fluid, so the outlook is subject to change. Politics haven’t driven the markets since the debt ceiling impasse dominated conversations in the spring, but with the rapidly fading possibility of a budget deal passing before the new fiscal year begins, a federal government shutdown on October 1<sup>st</sup> is suddenly looming. A prolonged shutdown would have a negative effect on GDP and keep the Fed sidelined. The prevailing thought at this point is that the tightening campaign may finally be complete, while the time frame for easing will be determined over the remainder of the year as events unfold. For the time being, bond yields remain very close to two-decade highs.

# Investment Officers' Certification

This report is prepared for the Carrollton-Farmers Branch ISD (the "Entity") in accordance with Chapter 2256 of the Texas Public Funds Investment Act ("PFIA"). Section 2256.023(a) of the PFIA states that: "Not less than quarterly, the investment officer shall prepare and submit to the governing body of the entity a written report of the investment transactions for all funds covered by this chapter for the preceding reporting period." This report is signed by the Entity's investment officers and includes the disclosures required in the PFIA.

The investment portfolio complied with the PFIA and the Entity's approved Investment Policy and Strategy throughout the period. All investment transactions made in the portfolio during this period were made on behalf of the Entity and were made in full compliance with the PFIA and the approved Investment Policy.

## Disclosures & Disclaimers

As a courtesy to investors this information: (1) is provided for informational purposes only; (2) should not be construed as an offer to sell or a solicitation of an offer to buy any security; and (3) does not replace customer statements.

This report is designed to provide general information and is not intended to provide specific legal, investment, accounting, tax or other professional advice.

It is important to review and save all source documents provided by a product sponsor or brokerage firm which may contain notices, disclosures and other information important to you and may also serve as a reference. If conflicts between this report and sponsor reports or confirmations exist, the information provided by the product sponsors shall prevail. Fees and sales charges paid may not be reflected in the information.

The information and data contained herein is obtained from sources believed to be reliable but its accuracy or completeness is not guaranteed. Additionally, the information may contain assets held away from HTS, therefore investors should contact customer service or other representatives from the respective distributors or issuers to determine SIPC coverage for heldaway assets. HTS and HSAM do not guarantee the information contained herein or its accuracy or completeness regarding contributions, withdrawals, protected values. All information is subject to further review with client to validate final values.

It is not possible to directly invest in an index. Financial forecasts, rates of return, risk, inflation, and other assumptions may be used as the basis for illustrations. They should not be considered a guarantee of future performance or a guarantee of achieving overall financial objectives. Past performance is not a guarantee or a predictor of future results of either the indices or any particular investment. S&P rates the creditworthiness of individual bonds from: AAA highest to D lowest.

Investing in fixed income securities involves interest rate risk, credit risk, and inflation risk. Interest rate risk is the possibility that bond prices will decrease because of an interest rate increase. When interest rates rise, bond prices and the values of fixed income securities fall. When interest rates fall, bond prices and the values of fixed income securities rise. Credit risk is the risk that a company will not be able to pay its debts, including the interest on its bonds. Inflation risk is the possibility that the interest paid on an investment in bonds will be lower than the inflation rate, decreasing purchasing power.

Cash alternatives typically include money market securities and U.S. treasury bills. Investing in such cash alternatives involves inflation risk. In addition, investments in money market securities may involve credit risk and a risk of principal loss. Because money market securities are neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any other government agency, there is no guarantee the value of your investment will be maintained at \$1.00 per share, and your shares, when sold, may be worth more or less than what you originally paid for them. U.S. Treasury bills are subject to market risk if sold prior to maturity. Market risk is the possibility that the value, when sold, might be less than the purchase price.

Investing in stock securities involves volatility risk, market risk, business risk, and industry risk. The prices of most stocks fluctuate. Volatility risk is the chance that the value of a stock will fall. Market risk is the chance that the prices of all stocks will fall due to conditions in the economic environment. Business risk is the chance that a specific company's stock will fall because of issues affecting it. Industry risk is the chance that a set of factors particular to an industry group will adversely affect stock prices within the industry.

Securities offered by HTS: (1) are not FDIC (Federal Deposit Insurance Corporation) insured; (2) are not bank deposits; (3) are not guaranteed by any bank or by any other federal government agency. None of the named entities are affiliates of HTS or HSAM. Hilltop Securities Asset Management (HSAM) is an SEC-registered investment advisor. Hilltop Securities Inc. (HTS) is a registered broker-dealer, registered investment adviser and municipal advisor firm that does not provide tax or legal advice. Member of FINRA & SIPC. HTS and HSAM are wholly owned subsidiaries of Hilltop Holdings, Inc. (NYSE: HTH) located at 717 N. Harwood St., Suite 3400, Dallas, Texas 75201, (214) 859-1800, 833-4HILLTOP.
