

Verification of Lead Consumer Notice Issuance

PWS Name: Bath Elementary
PWS ID: OH7750612

Drinking Water Program - Compliance Notification
County: Summit

Submit this completed verification form within 5 business days of receipt of lead sample results. Submit to Ohio EPA DDAGW Central Office via email (preferred): DDAGW_lead_CN@epa.ohio.gov; fax: 614-644-2909; or mail: Ohio EPA - DDAGW, 50 West Town Street, Suite 700, Columbus, OH 43216, Subject: Lead Consumer Notice.

Lead Consumer Notice Requirements

All lead results:

- Issue Consumer Notice within two business days of receipt of lead sample results.
- Deliver Consumer Notice to the owner and persons served from the sample location using one of the following methods:
 - For results less than or equal to 15 µg/L: E-mail, hand delivery, phone call, or mail
 - For results greater than 15 µg/L: E-mail, hand delivery, phone call with written follow up (mail, e-mail, or hand delivery)
 - Any result (NTNC and Small Community Systems only): Post near sample location for a minimum of 7 days.
- If your PWS is a school, daycare, nursing home, or a juvenile correctional institution, you must provide lead consumer notice to legal guardians or powers of attorney within two business days of receipt of sample results. Please indicate if this requirement was completed by checking the following box (only required if your PWS is a school, daycare, nursing home or correction institution).

Any individual lead result greater than 15 µg/L:

- Within two business days of receipt of lead sample results, notify local health department of results.
- Include information regarding the availability of health screenings and testing of lead blood levels in the CN.
- For NTNC systems only, immediately remove from service all fixtures with results greater than 15 µg/L.

Fill in all sample data on the following page(s) and include all applicable information to verify lead consumer notice was issued in accordance with the requirements outlined above. Retain a copy of this report in your files with supporting documentation for a minimum of 12 years.

Include a representative copy of all CNs issued for lead samples less than or equal to 15 µg/L and one copy of each CN for lead samples greater than 15 µg/L.

By signing this document, whether handwritten or typed, I am providing a legal signature confirming that I acknowledge and warrant the truthfulness of the information provided in this document. I hereby certify that the Lead Consumer Notice was issued to all locations that were sampled by the dates specified on the following page(s). Issuance was made by the method(s) indicated.

Verification of Lead Consumer Notice Issuance

Sampling Data

Fill in all applicable information below to verify lead consumer notice was issued in accordance with the requirements.

Add additional rows as needed.

If a sample was submitted as DS000, include the sample location and address and submit an updated SMP ID

Spreadsheet to your Ohio EPA District Office, as applicable.

Non-Transient Consumer Notice of Tap Water Lead Result

Dear Consumer:

Bath Elementary School is a public water System (PWS) responsible for providing drinking water that meets state and federal standards. Drinking water samples were collected at the following locations. Results are summarized in the table below:

Sample Tap Location	Sample Collection Date	Lead Level Result (ug/L)	Greater or less than the lead Threshold Level (15ug/)
LC201 Lower level Bathroom #063	3/26/2024	<2.0 ug/L	Less than
LC202 Lower level bathroom #062	3/26/2024	<2.0 ug/L	Less than
LC203 Lower level bathroom #049	3/26/2024	<2.0 ug/L	Less than
LC204 Level 1 Kitchen prep sink	3/26/2024	<2.0 ug/L	Less than
LC205 Level 1 bathroom 127 by custodian office	3/26/2024	<2.0 ug/L	Less than
LC206-level 1 clinic sink rm 109	3/26/2024	<2.0 ug/L	Less than
LC207 Level 1 family toilet rm 115	3/26/2024	<2.0 ug/L	Less than
LC208 level 2 art rm 211 sink	3/26/2024	<2.0 ug/L	Less than
LC209 level 2 bathroom 249	3/26/2024	<2.0 ug/L	Less than
LC210 level 2 bathroom 262	3/26/2024	<2.0 ug/L	Less than
LC211 LL speech rm 032 sink	3/26/2024	<2.0 ug/L	Less than
LC212 level 1 bathroom 108	3/26/2024	<2.0 ug/L	Less than
LC213 level 1 bathroom 117	3/26/2024	<2.0 ug/L	Less than
LC214 level 1 special ed rm 134 sink	3/26/2024	<2.0 ug/L	Less than
LC215 level 1 special ed bathroom 135	3/26/2024	<2.0 ug/L	Less than
LC216 Level 1 bathroom 149	3/26/2024	<2.0 ug/L	Less than
LC217 level 1 bathroom 162	3/26/2024	<2.0 ug/L	Less than
LC218 Level 1 bathroom 163	3/26/2024	<2.0 ug/L	Less than
LC219 level 2 stem lab 204 sink	3/26/2024	<2.0 ug/L	Less than
LC220 level 2 bathroom 263	3/26/2024	<2.0 ug/L	Less than

What Does This Mean?

Under the authority of the Safe Drinking Water Act, the US Environmental Protection Agency (EPA) established the action level for lead in drinking water at 15 micrograms per liter (ug/L). This means PWS's must ensure that water from taps used for human consumption do not exceed this level in at least 90 percent of the sites sampled (90th percentile value). The action level is the concentration of a contaminant which, if exceeded, triggers treatment of other requirements which a PWS must follow.

In 2018, Ohio EPA established the threshold level for lead in drinking water at 15 ug/L. The lead threshold level is the concentration of lead in an individual tap water sample which, if exceeded, triggers additional notification requirements for those served by the

tap sampled. Additionally, if a sample exceeds the lead threshold level, the associated tap must be removed from service.

Because lead may pose serious health risks, US EPA established a Maximum Contaminant Level Goal (MCLG) of zero for lead. The MCLG is the level of contaminant in drinking water below which there is no known or expected risk to health, allowing for margin of safety.

What are the Health Effects of Lead?

Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.

Where Can I Get Health Screenings and Testing of Blood Lead Levels?

Health Screenings are available through Summit County Health Dept. They can be Contacted at 330.923.4891 or contact your health care provider.

What Can I Do to Reduce Exposure to Lead if Found in My Drinking Water?

- ***Run your water to flush out lead.*** If water has not been used for several hours, run water for thirty seconds to two minutes before using it for drinking or cooking. This helps flush any lead in the water that may have leached from the plumbing.
- ***Use cold water for cooking and preparing baby formula.*** Do not cook with, drink water, or make baby formula from the hot water tap. Lead dissolves more easily in hot water.
- ***Do not boil water to remove lead.*** Boiling water will not reduce lead.

What are the Sources of Lead?

Lead is unusual among drinking water contaminants in that it seldom occurs naturally in water supplies like rivers and lakes. Lead enters drinking water primarily as a result of corrosion, or wearing away, of materials containing lead in the plumbing. Buildings built prior to 1986 are more likely to have lead pipes, fixtures, and solder. New buildings can also be at risk, since even legally 'lead-free' plumbing may contain up to 8 percent lead. The most common problem is with brass or chrome-plated brass fixtures which can leach significant amounts of lead into water, especially hot water.

For More information, Please Contact: H2O Technologies @ 740.389.4514; visit US EPA's Website at www.epa.gov/lead; call the National Lead information Center at 800-424-LEAD; or contact your health care provider.
