# How to Connect to Wi-Fi off Network

Wi-Fi will **automatically** connect to the iPads. The name of the iPadOS Wi-Fi is _WFPSa_. Students and teachers will be able to connect to offsite Wi-Fi.

1. Go to **Settings**

2. On the left-hand side, click **Wi-Fi**

3. Click on the appropriate network.*

*Helpful note: if users are unable to connect to a network, it is sometimes helpful to "forget this network"
