### PHYSICAL THERAPIST ASSISTANT PROGRAM

#### OBSERVATION HOURS DOCUMENTATION FORM

Instructions: All applicants will be required to complete a minimum of 20 hours of observation in the field of physical therapy. Observation hours are required as a way to introduce you into the field of physical therapy. While all 20 hours may be completed at the same facility, it is recommended that the observation experience be completed at multiple locations. With the anticipation of an extremely competitive process, a student with observation hours at more than one location will have an objective scoring advantage over a student who completes all of their hours at a single location (See Objective Scoring Tool). Multiple clinical settings will allow for a more eclectic experience.

The observed Physical Therapist/Physical Therapist Assistant will help you complete this form. This form will be submitted with your application. You **MUST** complete one form per facility observed.
