1. Summer School | Activities in english for students from 3 to 14 years old

Computing

We use programmes such as "Mouse in the House" for the younger children and "Discovery Coding" for the older ones. They will learn to use the computer and to program in a fun and entertaining way.

Fun Science

We bring science closer to children through simple and fun experiments.

Sport

During the morning there will also be time for sports such as tennis, basketball, football and water games

Music

They will learn to develop a taste for music and to appreciate the compositions of great masters.

Arts and Craft

They will make art work using recycled materials and respecting nature.

Cooking

Cooking is a great game that stimulates children's creativity and they will enjoy preparing delicious healthy recipes!

2. Afternoon workshops + 7 years old

- Science, Computing and Videogames
- Arts and Crafts
- Music and Theatre

3. Master in videogames +14 years old

A programme to enter the incredible world of video game development while acquiring key skills for one of the most sought-after professional opportunities. The duration of the course, 100% practical, is five weeks, combining online and offline training and personalised tutorials, in small groups to guarantee the quality of the course.

PRICE | 1.799€ Cheer up! There are only fifteen places available

5000+ students follow these courses in Spain and America
