Description of district's efforts to screen and identify dyslexia

Lakeview uses screeners to identify students who are having reading difficulty. This data is reviewed on an ongoing basis and during data meetings. Data regarding student reading levels, decoding skills, phonics skills, and phonemic awareness are used to determine the need for intervention support. Student history is also reviewed including family, intervention, and support team. Students who demonstrate inadequate response to support may be referred to the Student Support Team.

Description of district's efforts to screen and identify convergence insufficiency disorder

This vision disorder is not a part of the district's annual school-wide vision checks. However, teachers are asked to observe for vision concerns for all students. Students with vision concerns will be directed to the district nurse for a convergence screening. If there is a potential concern, the district nurse will contact parents. Parents would then be responsible for any follow-up with an eye doctor.
