BOARD OF TRUSTEES

Dawn Miller	Position 1
Delma Abalos	Position 2
Wayne Woodall	Position 3
Chris Stanley	Position 4
Dr. Steve Brown	Position 5
Tammy Hawkins	Position 6
Bob Thayer	Position 7

SUPERINTENDENT CABINET

Dr. Scott R. Muri, Superintendent of Schools
Dr. Anthony Sorola, Associate Superintendent of Human Capital/Operation/Athletics
Dr. Keeley Boyer, Chief of Schools
Deborah Ottmers, Chief Financial Officer
Dr. Lilia Nanez, Associate Superintendent of Curriculum and Instruction
Alicia Syverson, Assistant Superintendent of Student & School Support
Mike Adkins, Communications Officer
Dr. Kellie Wilks, Chief Technology Officer
Jerry Mahana, Director of Purchasing

INTRODUCTION

As Ector County ISD grows and builds new schools or renovates existing schools, the District is committed to creating future-focused learning environments that meet the needs of new generations of learners. These new construction projects must align with the Board-adopted Strategic Plan, including its Core Beliefs & Mission to inspire and challenge every student to be prepared for success and to be adaptable in an ever changing society. The District also believes that student success is best achieved in a supportive climate and safe environment.

ECISD is committed to producing graduates who have a rigorous academic foundation as well as other attributes that focus on the whole student. The construction of new schools and classroom additions provides Ector County ISD an opportunity to design and build these learning environments. With this goal in mind, keeping an eye on student-centered learning and other future-focused design concepts outlined in these School Education Specifications.

The Texas Education Agency requires all school districts to create and review a written educational program that guides the design process of new proposed facilities or major renovations. These educational specifications should include a description of the proposed project and a range of issues and alternatives to be considered. During this process, the district shall allow for input from teachers, other school campus staff, and District program staff in developing the educational specifications.

Educational specifications are necessary as they provide the link between learning and the design of educational facilities. They outline essential educational concepts and detailed facility needs, considering community values, current and future educational delivery, and the impact of technology on learning.

Educational specifications are an integral part of the Ector County Independent School District Long Range Strategic Plan and they have been developed to support the District's vision and strategic goals. Educational specifications should support the overall educational goals of the District, yet be nimble enough to allow for the effective and efficient design of school facilities.

The educational specifications provide specific facility needs required to complement the District's educational delivery model. They also provide consistency among similar project types between campuses to reduce inequities and simplify the planning process of future projects.

It is important to note the intent of these educational specifications should be used as a tool

for communicating the physical requirements of learning environments between educators, design professionals, and community members. This document should also be used as a guide for assessing current facilities and identifying future facility priorities. It is important to keep in mind that this is the initial document and is only the starting point for discussions regarding ECISD facilities. This document is expected to evolve as the District evolves and will need periodic updates.

EXECUTIVE SUMMARY | EDUCATIONAL SPECIFICATIONS

Educational Specifications (Ed Specs) are strategically aligned to the district's vision, mission, and educational goals. They guide the design process of new facilities or major renovations to existing structures. The information is intended to be used in conjunction with the educational and strategic goals of Ector County ISD and the District's overall Long-Range Facility Master Plan. The Ed Specs are to be made available to design professionals prior to the commencement of capital improvement projects. This satisfies the Texas Education Agency (TEA) requirements relating to written educational program documents.

Effective for all capital improvement projects beginning Nov. 1, 2021, and thereafter, Texas School Districts are required to comply with new TEA standards. Spaces and issues addressed in these standards include:

Educational Specification documents are intended to guide planning in a way that creates consistency from campus to campus, increasing equity while remaining fluid enough to allow for innovative, effective, and efficient school design. Content identifies essential instructional concepts and detailed facility needs, taking into consideration current and future educational delivery models, the role technology plays in the instructional environment, and the shared values of community members and educators.

Educational Specifications serve the following purposes:

1. Communicate district expectations regarding parity across district educational facilities and establish expectations for future designs or renovations.
2. Form consensus among educators at the District Leadership level regarding grade level alignments, capacity calculations, and establish parameters for campus input, as well as campus type levels regarding space type activities, tools, and aesthetics.
3. Establish a benchmark which creates a baseline condition to facilitate future assessments, helps establish consistency/equity across district educational facilities, and measure the alignment of physical environments with educational models.

EXECUTIVE SUMMARY | EDUCATIONAL SPECIFICATIONS

Educational Specifications consider multiple sources of compliance inclusive of the Texas Education Code, State, City/County and other Regulatory entities. There is little to no room for how these rules are interpreted. District standards around space, technology, and security create boundaries for the development of specifications. Campus flexibility and customization guidelines are established to meet the desired educational outcomes.

Minimum Requirements:

1. District mission, vision, goals, and pedagogy expectations:

The district's current mission, vision, and goals are to be included in the Educational Specifications. The Educational Specifications should be updated to reflect updates and changes as they are made. ECISD leadership is required to identify minimum expectations relating to pedagogy identifying frameworks and techniques to be used for teaching in learning.

2. Details related to facility type, grade levels served, and maximum student enrollment:

Educational Specifications identify the specific types of facilities a district will use for instructional purposes and what grade levels will be served at each facility. ECISD leadership has determined the maximum student enrollment in each classroom. Room size specifications accommodate the state maximum of 22 students per classroom in grades PK-4. There is no maximum student enrollment designated by TEA for grades five and above in general education classrooms.

3. Pertinent provisions of the multi-hazard emergency operations plan that informs the functionality of facilities:

At minimum, TEA requires districts to identify communication infrastructure for every classroom and access control information for all exterior doors. Project scope and construction budget determines what additional safety measures must be included in the Educational Specifications.

Project Budget	Added Safety Measures
\$1 M to \$5 M = 1 additional measure (any)	Exterior Door Numbering
\$5 M to \$10 M = 2 additional measures (any)	Visitor Management
>\$10 M = All 3 additional measures required	Security Cameras

4. Guidance on inclusive design and how it is addressed through facility design:

Through the Educational Specification development process, district team members identified expectations for inclusive design as it pertains to the full range of human diversity. This includes, but is not limited to, designing for varying levels of ability when it comes to mobility, dexterity, eyesight, hearing, and memory of the intended audience. Information contained in this section guides designers in how to develop experiences that serve as many people as possible.

5. Minimum total square footage required to comply with TEA methodologies:

TEA allows districts to choose between two space calculation compliance methodologies – quantitative versus qualitative – which are also dependent upon the flexibility level. School Board members are required to approve and adopt direction on the compliance methodology and flexibility level prior to the design phase of any capital improvement project started after Nov. 1, 2021.

Disclosure Statement:

TEA has not provided clarity around if a district is required to bring all spaces in a building up to compliance when making renovations. Ector County ISD should consult with their attorney to make appropriate decisions regarding existing spaces during renovations and additions.

OVERVIEW | CONSIDERATIONS

The Educational Specifications cover a broad range of information but are not intended to be all inclusive. This document is a MINIMUM REQUIREMENT document. The district will determine where it is appropriate and necessary to require architects to design buildings on a larger scale.

APPLICATION OF THE EDUCATIONAL SPECIFICATIONS

The Educational Specifications identify specialty programmatic spaces that are current and relevant to Ector County ISD in 2023. This document is not intended to communicate that all specialized programmatic spaces will be provided in all future buildings. All design professionals should confirm programmatic inclusion during the project scope work. Specialized programs include Special Education, Fine Arts, Physical Education, and Career and Technical Education.

Ector County ISD maintains current district standards for building, technology, safety and security, and specific programs. The district standards should be referenced during the design and building process. Where the Education Specifications and the district Standards contain different information, it is the responsibility of the architect to confirm district desires at the time of design.

When planning for future bond projects, the district should use programming documents to guide decisions regarding square footages and pricing. The Education Specifications are minimum requirements and may not accurately reflect the total square footage that Ector County ISD desires in a new space.

Consideration should be given to the following guiding principles:

FLEXIBILITY

- Mobile and flexible furniture that encourages responsiveness to different situations.
- Allows for teachers and students to present and engage through various environmental configurations.

ACCESSIBILITY

- Easy and frequent exposure to natural lighting and outdoor spaces.
- Infrastructure that supports 1:1 device opportunities as well as desktop capabilities for some classrooms.
- Inviting and engaging environments that promote community involvement.

OVERVIEW | CODES

STATE STANDARDS AND LOCAL CODES

All Ector County ISD schools shall comply with the following:

- Texas Education Agency's School Facility Standards, Texas Administrative Code, Chapter 61, Subchapter CC, Rule 61.1040 for all construction on or after November 1, 2021
- Architectural Barriers Texas Accessibility Standards (TAS), adopted in 2012
- Building codes as adopted by the cities within the Ector County ISD boundaries. In the case there is no code adopted, schools shall abide by the current version of the International Building Code.

OVERVIEW | SAFETY AND SECURITY

Student and staff safety in our schools is of paramount importance and must be viewed as a priority consideration of these Educational Specifications. Ector County ISD best practice guidelines follow the mandated TEA standards (Updated fall 2021; May 2023).

Site Security Guidelines

- Each Site should have a minimum of 2 main access points / drive approaches to support traffic control and First Responder access.
- Provide fencing around all portable buildings tying back to main campus.
- Visibility is the primary deterrent. Landscaping must not provide places to hide or mask windows from street view.
- Provide LED exterior lighting judiciously placed to enhance visibility and deter wrongdoing.
- Site and Directional Signage should be reviewed no later than Design Development with Planning & Construction.

Building Security Guidelines

- Fire Safety minimum requirements as outlined in code should be used for reference and compliance.
- Building design should simplify corridor design to minimize hidden areas and help with supervision. Minimum clear hallway widths should not be reduced by backpack storage or lockers.
- Provide overhead gates to divide off certain areas of the building for after hours use. Confirm locations with Fire Marshal and coordinate automated controls tie-in to Fire Alarm Control Panel.
- Provide evacuation maps for district's use and identify shelter in place locations on map. All areas of refuge should be confirmed with ECISD.
- In secondary campuses, locate SRO / Police Officer office outside of Admin Suite, but nearby. Provide direct access to Main Hallways, as well as a nearby exterior door.
- Provide intrusion alarm keypads at front office, kitchen exterior door, classroom doors. See door.
- Provide 2-way communication system at all classrooms.
- Provide vision panels in all learning environment doors.
- Classroom door locks should allow classrooms to remain locked at all times.

SUPPLEMENTAL RECOMMENDATIONS | REQUIREMENTS

Entry Point Guidelines

- A single point of entry for visitors to the campus will be provided as part of all new and campus renovations. This is accomplished using a secure entry vestibule.
- Limit the number of entries/exits to a campus wherever possible, while still meeting emergency egress requirements as outlined by the governing building codes.
- Secondary exits will be monitored (contact sensors + security cameras) and access gained only through card reader activation.
- All instructional facilities campus-wide, including portable buildings, must include the addition of **graphically represented alpha-numerical characters** on both the interior and exterior of each door location. Start with Main Entry door and number in clockwise direction.
- Include key-card access on exterior doors for new and renovated buildings.

Security Camera Guidelines

- Security Camera quantity will be based on building configuration; review early in Schematic Design with ECISD Administration, representatives from School Safety Team, as well as ECISD campus police.
- Security Cameras should be positioned to capture all entry points, major courtyards, service courts (generator set), outdoor learning spaces, and bus drop off. Include any exterior areas that are "hidden" from passive observation based on final building configuration.
- Pre-Wire for future video and audio feeds from Special Education Rooms per Senate Bill 507.

Access Control System Guidelines

- Develop a document that designates each exterior door of each instructional facility campus wide as either primary, secondary, or non-designated entrances.
- Kitchen / Service entry to receive card reader, annunciation bell, and Security Cameras. No remote release needed.
- Access Control System Locations:
 - The security vestibule at the school's primary entrance
 - Select doors as deemed necessary for staff access
 - All doors into Administration area from lobby and from all the surrounding corridors

Programming Checklist

- The following topics should be reviewed, and requirements documented during the Programming Phase of the project. Meeting to include representation from ECISD Administration, representatives from School Safety Team, as well as ECISD campus police.
- Current TEA Standard policy alignment
- Police / Security Officer campus presence
- Camera-Phone locations
- Secured Entry Vestibule | Placement of Security Film
- Access Control Points | Intrusion Alarm System
- Security Cameras | Remote monitoring capabilities
- Site Fencing | Site Lighting
- Lockdown protocols | Panic Buttons | Electronic Door Hardware
- Typical Hardware Sets
- PA System | Emergency Communication Links
- Panic Alert System

DISTRICT INFORMATION

STRATEGIC PLAN 2019-2024

In March 2019, the seven Ector County ISD Trustees plus the Superintendent began work on a strategic plan to guide the District for the next five years. From their initial work came the overarching Vision. Over the next year, more than 100 people – school district leaders, campus leaders, teachers, students, parents, and wide array of community members – strove to create a plan that will carry out the District's Mission.

“Believing OUR Students are THE Future, the mission of Ector County ISD is to inspire and challenge every student to be prepared for success and to be adaptable in an ever-changing society.”

The strategic planning team worked from the foundation of 12 fundamental **Beliefs**.

Receiving a quality education is a fundamental right for every student

Preparing our graduates for success after high school

Engaging in learning is a shared responsibility between students, staff and parents

Valuing our students, staff, parents and community

Identifying a pathway for success for every student to become a leader

Providing a consistent and viable education for every student

Recruiting, retaining, and developing the best people

Making decisions that are driven by the needs of students

Setting each other up for success

Upholding community traditions and civic engagement

Embracing diversity

Learning that is supported by safe and healthy student classrooms and school culture

From this work came three areas of focus; three strategic themes - Foundational Excellence, Talent Development, and the Learning Journey.

Our new strategic plan is not just a long list of boxes to check. It is a theory of action, if implemented well, it will forever influence and change the paths of our students. Their future is in our hands, and **The Future is Now.**

FOUNDATIONAL EXCELLENCE

We will create an organization that operates with excellence today, while continuously researching and developing tomorrow's practices. We will be a district of leaders.

STRATEGIC PLAN PROJECTS:

Systematize Social Emotional Learning

ECISD will build a district-wide awareness and commitment to develop, implement and integrate Social Emotional Learning (SEL) initiatives district wide acquiring and applying the knowledge, skills, and attitudes to develop healthy identities, manage emotions and achieve personal and collective goals, feel and show empathy for others, establish and maintain supportive relationships, and make responsible and caring decisions. Additionally, ECISD will develop an adult collective understanding and shared vision of SEL that creates systemic change where SEL can thrive and advance educational equity and excellence through authentic school-family-community partnerships.

Systematize Equity Based Funding

ECISD will systematize equity based funding which allocates non payroll budgets to schools based on student population and individual student needs so that schools can serve students with the appropriate support and resources.

Incorporate Modified Zero-Based Budgeting

ECISD will incorporate modified zero-based budgeting which allocates non payroll budgets to departments based on prioritized needs and specific requests so that departments provide intentional and effective support services.

Develop Long Range Facilities Master Plan

The LRFP will bring our facilities up to date through a long range building replacement cycle.

Develop Efficient Systems to Increase Productivity in Operations

By developing and implementing efficient operational systems, ECISD District Operations will ensure improved facilities and operational processes, therefore elevating the student, staff, and community experience in our buildings and on our buses.

Attain Data Interoperability

Achieve accurate, accessible and timely data for district analysis.

Earn Trusted Environmental Seal

ECISD will make adjustments to current practice that will enhance district processes that ensure student and business data security and earn the national Trusted Learning Environment seal.

Establish District Technology Standardization

Modernize tech standards by establishing a mobile device standard and equipping classrooms/ spaces with a wireless canopy.

Provide Home Internet Connectivity

Ensure all ECISD students have broadband access at home.

ECISD Strategic Themes

TALENT DEVELOPMENT

We will invest in talent; recruit, train and retain quality people committed to equipping our students for the future.

STRATEGIC PLAN PROJECTS:

Strengthen Professional Learning Communities

Implement Professional Learning Communities with fidelity following the Relay Model in Data Driven Instruction process, develop TEKS know/show, and engage in Observation/Feedback in order to build the capacity of teachers.

Implement Personalized Professional Learning

Ector County ISD will grow all staff to be highly effective to provide a quality educational experience for all students. By engaging in job-embedded, personalized professional learning. Staff will add to their skill set and be supported to promote staff retention and create pathways for advancement.

Cultivate Talent Pipelines

Ector County ISD will develop systems to strengthen the qualified pool of potential candidates for positions within ECISD thus reducing openings and the cost and time to hire.

Incorporate Strategic Staffing and Compensation

Ector County ISD will use strategic staffing to optimize the current and future workforce of the district while also embedding strategic compensation to attract, retain and grow talented employees.

Develop a System of Support for National Board Certification

Provide growth and development opportunities for instructional staff by facilitating and supporting eligible staff through the process of obtaining National Board Certification

LEARNING JOURNEY

We will ensure students are challenged with rigorous, relevant curriculum, while supporting them socially and emotionally to equip them for an ever-changing society.

STRATEGIC PLAN PROJECTS:

Establish “To and Through” Post-Secondary Department

The mission of the To and Through Post-Secondary Department is to provide our students opportunities to prepare for the future and be successful in their college, career, and military goals.

Develop Choice Schools

ECISD will create a comprehensive school choice program designed to meet the needs of student interests, campus innovation/transformation, enrollment growth and campus capacity, and aligned to workforce demands.

Systematized Blended Learning

ECISD will implement research based instructional models which enable personalized learning for all students.

Redesign the Student Summer Experience

Summer learning will focus on the acceleration of instruction and address the opportunity gap of our students.

Implement a Learning Management System

ECISD will utilize technology resources that will enable students, teachers, and leaders to implement and monitor personalized learning for all through implementation of a learning management system.

Expand Pre-K

This charter is designed to address the need for high quality education in Pre-K 3 and Pre-K 4 in order to ensure that our students are Kindergarten ready.

Ector County Independent School District | Odessa, Texas

QUICK FACTS

33,500 STUDENTS

- 79% HISPANIC
- 14% WHITE
- 3% AFRICAN AMERICAN
- 4% OTHER

- 3 EARLY EDUCATION CENTERS
- 28 ELEMENTARY SCHOOLS
- 6 MIDDLE SCHOOLS
- 2 COMPREHENSIVE HIGH SCHOOLS
- 2 EARLY COLLEGE HIGH SCHOOLS
- 1 NEW TECH HIGH SCHOOL
- 1 STEM K-12 CAMPUS
- 1 ALTERNATIVE EDUCATION CENTER

Employees

25 COUNTRIES REPRESENTED

4,200 TOTAL EMPLOYEES

- Canada - Chad - China - Colombia - Cuba - France - Ghana - Honduras - India - Jamaica - Mexico - Nepal - Nigeria - Pakistan - Peru - Philippines - Portugal - Puerto Rico - Russia - Saint Lucia - South Africa - Spain - Turkey - Uganda - Venezuela

2,000 TEACHERS

144 INTERNATIONAL TEACHERS

32 LANGUAGES SPOKEN

Languages

7,000 STUDENTS IDENTIFIED AS EMERGENT BILINGUAL

4 LANGUAGES TAUGHT
AMERICAN SIGN LANGUAGE • FRENCH • LATIN • SPANISH

172 BUSES

Operations

TRANSPORT 7,000 STUDENTS DAILY

COVERING APPROXIMATELY
1.8 MILLION MILES PER YEAR

\$384 MILLION BUDGET

6.4 Million MEALS SERVED PER YEAR

5,015,905 SQ. FT. TOTAL DISTRICT SQUARE FOOTAGE

8 YEARS NAMED BEST COMMUNITY FOR MUSIC EDUCATION BY NATIONAL ASSOCIATION OF MUSIC MERCHANTS FOUNDATION

Programs

40 AVID CERTIFIED CAMPUSES & ONE NATIONAL DEMONSTRATION SCHOOL

26 CAREER & TECHNICAL EDUCATION (CTE) offering programs of study that prepare students for in-demand and high wage careers, dual-credit, and industry-based certification opportunities.

Other Fun Facts

ONLY district west of Amarillo and Lubbock to have

\$36.3 MILLION COLLEGE SCHOLARSHIP OFFERS IN 2021-2022

APPROXIMATELY **\$38 MILLION** IN GRANT SUPPORT

5

Texas Vaccine for Children Clinics in our schools.

FIRST SCHOOL DISTRICT TO PARTNER WITH SPACEX/STARLINK

Believing *OUR Students are THE Future*, the mission of Ector County Independent School District is to inspire and challenge every student to be prepared for success and to be adaptable in an ever-changing society.

Their future is in our hands, and **The Future is Now.**

Updated October 2022

TEA STANDARDS | SAFETY AND SECURITY

Compliance requirements applicable to all instructional facilities campus-wide.

A capital improvement project of a school district must include campus-wide implementation of the following provisions:

A.) Communications Infrastructure

In accordance with TEC 37.108, a school district shall:

- i. **Develop a multi-hazard plan** that provides measures to ensure that school district communications technology and infrastructure are adequate to allow for communication during an emergency;
- ii. **Implement measures on new and renovated buildings to ensure every classroom and portable classroom provides** district employees, including substitute teachers, access to a telephone, cellular telephone, or other electronic communication device to allow immediate contact with district emergency services or emergency services agencies, law enforcement agencies, health departments, and fire departments; and
- iii. **Develop site plans and floor plans for a school** in accordance with TEC 37.108.

B.) Access Control

A school district shall develop a document that designates each exterior door of each instructional facility campus wide as either **primary, secondary, or non-designated entrances** and shall ensure that the **documented designation** of all exterior doors **becomes part of the long-range facility plan** prior to commencement of construction of a capital improvement project

Additional Standards based on project construction budget.

The project construction budget approved by the school district shall determine how many of the additional safety and security standards established in paragraph 3 of this subsection are required for the project.

The school district shall designate in writing which of the items approved by school board to the prime design professional/design professional of record prior to commencement of the construction documents phase of project.

- A. Project construction budget is \$1 - \$5million = 1 additional standard
- B. Project construction budget is \$5 - \$10million = 2 additional standards
- C. Project construction budget is over \$10 million = 3 additional standards

Additional safety & security standards applicable to all instructional facilities campus-wide. A school district must include campus-wide implementation of the following standards in accordance with terms and requirements of paragraph (2) of this subsection.

A.) Exterior Door Numbering

All instructional facilities campus-wide, including portable buildings, must include the addition of graphically represented alpha-numerical characters on both the interior and exterior of each door location. The characters may be installed on the door, or on at least one door at locations where more than one door leads from the exterior to the same room inside the facility, or on the wall immediately adjacent to or above the door location. Characters shall comply with the IFC 505.

The **primary entrance** shall always be the first in the entire sequence and is the only door location that does not require numbering.

The **numbering sequence** shall be clockwise and may be sequenced for the entire campus or for each facility individually.

The **design professional of record** shall coordinate with school district personnel and local emergency response personnel prior to incorporating exterior door numbering characters and locations into the contract documents for the facility.

The **design professional of record** shall coordinate this with signage accessibility requirements.

B.) Visitor Management

All **primary entrances** must include the following:

- i. An unobstructed line of sight of approaching visitors through physical or digital means.
- ii. A physical barrier that prevents unassisted access to the facility by a visitor; and
- iii. A location for a visitor check-in and check-out process.

Security Cameras

All **primary and secondary entrances** must include a security camera.

Panic Alert Systems

All rooms are to have access to a panic alert system. Districts have the flexibility to determine which system best suits their needs.

EXECUTIVE BUILDING SUMMARY

Building Capacity

What is Capacity?

Capacity is the number of students that can be accommodated in a building for instruction in a maximally efficient manner. Capacity numbers are affected by a series of variables including room use, planning factors, building infrastructure, class size, and building codes. Planning factors are used to determine a ratio for teaching staff to students.

Capacity numbers are governed by state standards but also reflect a school system's values and the resources the district has available. Class size policy, as determined by the school board, directly affects a building's capacity total.

How is it determined?

Capacity numbers are calculated differently for different states and school districts, and they are also calculated differently for elementary and secondary schools.

Elementary schools' capacity is generated by multiplying the number of classrooms times by a planning factor and then determining what other spaces contribute to the capacity numbers in a facility, such as special education spaces and pull out programs. In addition, the size of the core spaces (library, cafeteria, restrooms) is evaluated to determine a maximum number of users.

Secondary schools' capacity is generated by multiplying the number of classrooms by a planning factor and then determining what elective spaces contribute to the capacity numbers in the facility due to usage. Spaces used all but one period of the day are counted towards capacity. In addition, the size of the core spaces (library, cafeteria, restrooms) is evaluated to determine a maximum number of users.

Why does it change?

As populations grow and change, a need may arise for changing a room's use. If a room is converted from a non-capacity bearing function (e.g., a computer lab) to a classroom space, a new classroom's worth of capacity is added to the total building calculation.

METHODOLOGY

DESIGN CAPACITY

The total number of student "seats" the facility was designed to accommodate.

FUNCTIONAL CAPACITY

Elementary School capacity was determined with a 95% utilization factor. Middle School and High School Capacity was determined with an 85% utilization factor.

EXECUTIVE BUILDING SUMMARY

Building Capacity

School capacity and classroom sizes are based on the TEA Facility Standards Quantitative Compliance Method and Flexibility Level 2 (L2) for all schools.

Elementary Schools

Design 800 Student capacity was determined using the following criteria:

- Planning factor: 22 students per classroom for Pre-K.
- Planning factor: 25 students per classroom for K-5th grade.
- All general use classrooms were counted.
- Special Education classrooms were included in the counts with a planning factor of 10 students per classroom.
- IPS rooms were not included in the counts.
- Other spaces not counted:
 - Art Room
 - Music Room
 - Resource Room
 - Gym
 - Cafeteria

Middle Schools

Design 1200 Student capacity was determined using the following criteria:

- Planning factor: 28 students for each general classroom.
- Elective and program spaces were included as follows:
 - 26 students each for science, health, journalism, and art classrooms.
 - 28 students each for touch systems data entry classrooms.
 - 24 students each for PLTW, robotics, and computer science classrooms.
 - Drama was included in the counts at 25 students.
 - Band, choir, and orchestra were included in the count at 50 students per class.
- The Competition and Practice Gyms were not included in the counts.
- Special Education specialized classrooms were included at 12 students each.

High Schools

Design 2500 capacity was determined using the following criteria:

- Planning factor: 26 students for each general classroom.
- Elective and program spaces were included as follows:
 - 28 students each for all CTE classroom, except as noted below.
 - 24 students each for PLTW, engineering, auto tech, construction, welding, and culinary.
 - 25 students each for Drama.
 - 26 students each for Art.
- The Competition and Practice Gyms were not included in the counts.
- Fine Arts classrooms were not included in the counts.
- Special Education specialized classrooms were included at 12 students each.
- ROTC classrooms were not included in the counts.

* The Texas Education Code states that for grades K-4, the student to staff ratio may not exceed 22:1; however, school districts that exceed that ratio may apply for waivers at the beginning of each school year. There are no requirements for secondary schools.

EXECUTIVE BUILDING SUMMARY

FUTURE READY LEARNING ENVIRONMENTS

Ector County ISD's renovations and new school facilities need to be designed to provide environments where innovation, creativity, and collaboration will thrive. In order to best align these environments to Ector County ISD's Design Principles and the major themes from the Design Principles Committee meetings, facility design should consider the following:

Naturalness:

Light: Diffused natural light helps to create a sense of physical and mental comfort, and its health benefits are many, boosting Vitamin D storage and increasing productivity. When combined with a well-designed artificial lighting solution, well-lit environments can be a boost to student success.

Air Quality: Opportunities to enhance air quality should be included via a combination of outside air and mechanical ventilation. School age student's lungs are particularly vulnerable to all types of pollutants because their breathing and metabolic rates are high, therefore particular care should be given to air quality.

Temperature: The right temperature can have a profound impact on achievement, as it can affect comfort levels and attention spans. Building orientation and sun glare control can greatly help with temperature goals.

Links to Nature: Access to the outdoor environments and views to the exterior are associated with improvements in the creative process. Ector County ISD schools should include learning environments that open directly to outdoor learning areas that allow play and social interaction.

Individualization:

Flexibility: The flexibility of learning spaces and its furnishings can encourage individualization by offering a variety of opportunities for diverse settings, individualized learning, and team work. Flexible learning environments allow for changes in pedagogical goals, educational programs, and instructional deliveries.

Ownership: Personalization of a space is essential in the development of students' identities and sense of worth. Learning environments should include furnishings that are mobile, allowing students to reconfigure their space, and ample display areas to feature student work so students feel a connection to their learning environment.

Connection: In school environments, connection relates to the pathways between spaces. Enhancing those pathways, through engaging settings such as providing landscaping to enhance outdoor settings, and active hallways can result in a stronger connection for students and their learning environment.

Stimulation:

Complexity: Visual diversity in an organized manner is linked to increased student engagement. However, too much complexity can be detrimental to learning. Therefore, environments that provide a bright sense to the classroom, without becoming too chaotic, should be provided throughout.

Color: Introducing color in a planned manner can stimulate student engagement. Muted walls, not white, can provide a neutral palette for brighter elements, such as furniture and wall displays.

EXECUTIVE BUILDING SUMMARY

BUILDING SYSTEMS & UTILITIES

Ector County ISD schools shall be designed to be energy efficient, yet provide students and staff with the most effective learning environments to support learning. The mission of the ECISD Energy Management Program is to save money and energy through the conservation and efficient use of natural gas, water, and electricity, while maintaining a safe and comfortable learning environment. The goal of Ector County ISD is to achieve at least 25% reduction in energy bills. To that effect, schools should be designed to include the following:

Heating, Venting and Air Conditioning (HVAC)

- Heat and AC thermostat; connect all systems to ECISD energy management systems
- Provide dedicated HVAC for the following rooms:
 - MDF
 - IDF
- Confirm adequate HVAC is provided where these items are present:
 - Copiers
 - Ice Machines
 - Vending Machines
- Building HVAC zoning:
 - Building HVAC design should align with building usage, mainly after hours and summer usage. Provide separate zones for the following areas:
 - Cafeteria and all associated spaces.
 - Athletic areas used during after hours.
 - Kitchen and all associated spaces.

Electrical

Power

- Provide a minimum two outlets on every wall in learning environments (Min. 8 per room)
- Provide outlets every 8' in all other locations.
- Limit floor outlets where possible. Refer to room layouts for specific locations.
 - Provide floor outlets at conference room tables. Coordinate with conference table design.
 - Provide retractable overhead power reels at Maker Space.
- Outlets to include both 110v power and USB.
- Provide multiple charging stations at library, dining, collaboration spaces, and corridors. Provide charging lockers in collaboration spaces.
- Provide dedicated outlets above countertops at teachers' lounge and workroom, and in areas where multiple appliances and machines will be used simultaneously.
- Provide adequate power and data for all copiers based on manufacturers recommendations.

Lighting

- 2x4 LED light fixtures.
- Dual switching in all learning environments.
- Daylight harvesting as required by local codes.

Plumbing

- Provide electric drinking fountains with bottle filling capability.
- Provide tempered and cold water connections for sinks in classrooms.
- Provide door access to all plumbing chases (7'-0" tall).
- Provide hose bibs in all restrooms for cleaning.

Refer to Ector County ISD's Technical Design Guidelines for detailed information on the above systems.

EXECUTIVE BUILDING SUMMARY

SUSTAINABILITY

School districts are continually embracing the benefits of sustainable schools. Smart design of the district's new schools and renovations of existing schools can not only create comfortable and ideal environments for learning, but will reduce utilities and operating costs for the district. Sustainable schools cost less to operate allowing for the reallocation of resources to the classroom.

In general, the core principles of sustainability include the following:

- Decreasing the amount of energy the facilities consume, primarily electricity and water.
- Employing materials that are less resource consuming.
- Enhancing the learning environment by creating healthier indoor environments.

Sustainability will be a key factor in all decisions regarding learning environments and operational effectiveness. Student performance will be enhanced throughout the inclusion of daylighting, improved acoustics, and other strategies. The operational effectiveness of the facility will be considered in addition to material and system selections with consideration to maintenance and ease of operation. The use of local materials will celebrate the spirit of the community and decrease overall costs. Ector County ISD values sustainability in their schools. The schools should be used as an educational tool to teach students the importance of sustainable environments through displays, interactive maps, and working sustainable features.

The District will utilize innovative green design principles consistent with the Leadership in Energy and Environmental Design (LEED) requirements with the goal of meeting LEED Certification levels for all new projects and major renovations.

About LEED

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices. To receive LEED certification, building projects satisfy prerequisites and earn points to achieve different levels of certification. LEED for Schools has their own set of prerequisites and credits that differ from other building rating systems. LEED is transforming the way we think about how buildings and communities are designed, constructed, maintained, and operated across the globe. LEED certified buildings save money and resources and have a positive impact on the health of occupants, while promoting renewable, clean energy.

SAFETY & SECURITY

Student and staff safety in schools is of paramount importance. While incidents of school safety failures still remain largely rare, increased media attention and recent security events have made school districts and the general public acutely aware of the vulnerability that confronts the typical public school facility on a daily basis. Safety and security must therefore be an important consideration of these educational specifications.

Ector County ISD schools are community schools, where volunteers, parents, and the community are welcome. In order to ensure Ector County schools are safe and secure, the following minimum requirements must be included:

- Comply with CPTED (Crime Prevention Through Environmental Design) principles. All new and major renovations projects to obtain CPTED certification.

EXECUTIVE BUILDING SUMMARY

Exterior Security Factors

- Sites will be fenced to ensure all playground areas and play field areas are fully fenced.
- Fencing material to be as outlined in the Technical Design Guidelines, and/or as dictated by the area having jurisdiction.
 - Provide fencing around all portable buildings tying back to main campus.
- Visibility is the primary deterrent. Landscaping must not provide places to hide or mask windows from street view.
- Provide LED exterior lighting judiciously placed to enhance visibility and deter wrongdoing.
- Provide decorative bollards at all major entry areas (Main entry, cafetorium, etc.)
- Provide emergency call boxes close to parking areas and play areas.
- Provide blank box for future camera phone and security camera system for future portables.
- A single point of entry for visitors to the campus will be provided as part of all new campuses and campus renovations. This is accomplished through the use of a secure entry vestibule. The specific inclusions for this space are detailed in the space descriptions.
- Limit the number of entries/exits to a campus wherever possible, while still meeting emergency egress requirements as outlined by the governing building codes.
- Security camera systems and access control systems as outlined in the Technical Design Guidelines.
 - Security Camera numbers will be based on building configuration to ensure evidentiary quality video.
 - Access Control System Locations:
 - The security vestibule at the school's primary entrance.
 - All exterior doors.
 - All doors into Administration area from lobby and from all the surrounding corridors
 - Test storage and record storage rooms.
 - MDF and IDF rooms.
 - All hallway doors that separate classroom pods/wings.
- Classroom door locks should allow classrooms to remain locked at all times.
 - Provide door lock at bottom of the door.
- Provide camera phone at all entries servicing portable buildings. In the case of a new building, identify area where portable buildings may be sited, and provide conduit and blank box for future system installation.
- Lockdown system as outlined in the Technical Design Guidelines.
 - Panic buttons must be provided at the main reception area, Principal's office and Principal's Secretary's office.
- Provide intrusion alarm keypads at front office, kitchen exterior door, and custodial exterior door.
- Provide emergency notification system from central district to school.
- Classroom pod/wing configuration should allow for the ability to secure each pod/wing independently in the case of a lockdown. This can be accomplished with doors that separate these areas and are tied to the lockdown system. If these doors have glazing, the glazing must be protected with bullet resistant film as outlined in the Technical Design Guidelines.
- Building design should simplify corridor design to minimize hidden areas and to help with supervision.
 - Provide gates to divide the building for after hours use. Confirm locations with Fire Marshal.
- Provide two –way communication system at all classrooms.
- Provide all learning environment doors with vision panels or provide sidelights next to doors. Sidelights must have bullet resistant film. Confirm location of sidelights in layouts.
- Provide convex mirrors at all enclosed stairs to improve visibility and supervision.
- Provide room signs inside all rooms listing room number and emergency call number.
- Coordinate with Ector County ISD regarding shelter in place location. These spaces would preferably have lower ceilings, and 2 wall separation from exterior.
 - Provide evacuation maps for District's use and identify shelter in place locations on map.

EXECUTIVE BUILDING SUMMARY

TECHNOLOGY

It is the intent of Ector County ISD to provide facilities that are focused and infused with technology on a broad scale to support students and staff and foster collaboration and community. In addition, they try to anticipate the future of technology and plan for the ability to be flexible and adaptable to changes of programs, population, and technology.

Therefore, access to technology resources should be abundant and robust throughout. Technology supports education and thus should be as flexible as possible. Learning spaces should encourage collaboration and group work with high access to digital technology. Wireless connectivity inside and outside should be included.

Details in technology provisions are included in the appendix to this document. Some building wide considerations:

- Wi-Fi access points at all learning areas. Number of access points will depend on room size. Minimum of 1 access point per classroom.
- Wi-Fi access points throughout building. Location of access points will vary by area:
 - Administration areas – Locate Wi-Fi access points in corridor/hallways. Number of access points will vary based on building design.
 - Common areas: Provide multiple Wi-Fi access points to ensure coverage.
 - Outdoor Learning areas: Provide multiple Wi-Fi access points to ensure coverage.
- For all settings, provide coverage map showing overlap areas for ECISD Technology Department approval.
- Power for student device carts needed in all classrooms and in spaces where a student device cart is required.
- Phones should be provided in every office and workroom.
- MDF rooms shall be centrally located in building.
- IDF rooms shall be located throughout the building to meet cabling distance requirements. If the building is multi-story, stack IDF rooms where possible.

ACOUSTICS

Poor acoustical design in classrooms can result in excessive noise that is disruptive to the learning process and affects speech perception, student behavior, and educational outcomes. Good acoustical design enhances speech clarity and limits background noise to protect speech quality for both students and teachers. Speech clarity is highly dependent on the architectural design of a classroom, including size, shape, and surface treatments.

Providing acoustically sound learning environments is paramount to learning, so Ector County ISD learning environments shall be designed with enhanced acoustical properties to meet CHPS-TX and LEED criteria.

When considering renovations, classroom noise must be minimized. Classroom noise includes any auditory disturbance that interferes with what a listener wants and/or needs to hear, including noise from outside of the building (i.e., exterior noise intrusions, such as highway traffic, playground noise, jets) heard through the building structure; noise from within the building (e.g., children walking and talking in the halls, class bells, noise heard from room to room); noise from within the classroom (e.g., mechanical noise from the HVAC, clanking water pipes, technology used in the classroom).

Excessive reverberation in a classroom causes additional disturbance due to acoustic reflections. The desired signal is diluted due to reflections, which can also cause an increase in background noise levels.

EXECUTIVE BUILDING SUMMARY

Ector County ISD schools will be designed to the following minimum design standards:

1. All walls around classrooms and learning environments to run to underside of deck, and should achieve STC ratings as follows:

STC 45 If the adjacent space is a corridor, stair well, or office/conference room.

STC 50 If the adjacent space is another core learning space, speech classroom, or clinic

- Folding partitions in classrooms must meet this minimum requirement.

STC 53 If the adjacent space is a restroom or outdoor space.

STC 60 If the adjacent space is a music room, mechanical or electrical room, cafeteria, gym, or athletic space.

Reverberation criteria to meet LEED requirements in order to get certification.

Where possible and budget allowable, meet ANSI/ASA S12.60-2010/ Part 1 "American National Standard Acoustical Performance Criteria, Design Requirements and Guidelines for Schools."

Lastly, all fine arts performance and musical spaces need to be designed with the help of an acoustical designer so enhanced requirements can be correctly calibrated to the need. Other spaces that need this calibration include cafeteria, cafetorium, stages, and broadcast rooms.

CODES AND REGULATIONS

All Ector County ISD schools shall comply with the Texas Education Agency's School Facility Standards, Texas Administrative Code, Chapter 61, Subchapter CC, Rule 61.1036.

All Ector County ISD schools shall comply with Architectural Barriers Texas Accessibility Standards (TAS), adopted in 2012.

All Ector County ISD schools shall comply with building codes as adopted by the cities within our boundaries. In the case there is no code adopted, our schools shall abide by the current version of the International Building Code.

LIBRARY / MEDIA CENTER PROGRAM OF SPACES

PROGRAM DESCRIPTION

The media center area within elementary schools should be the heart of the campus and the main gathering place where students, staff, and visitors can see the collaborative spirit of the school and innovative work being done. Special care should be taken to make sure the library/media center is a vibrant and inviting space for the school and the community. The space should be an area where students can gather for group learning and reading as well as book check-out, research, collaborative project building, and independent learning.

The library/media center should be flexible to allow for multiple activities to take place at once. Included in and adjacent to the media center are various spaces such as a maker space, digital learning lab, broadcast studio, and access to outdoor learning.

GENERAL ACADEMICS SPATIAL RELATIONSHIPS & ADJACENCIES

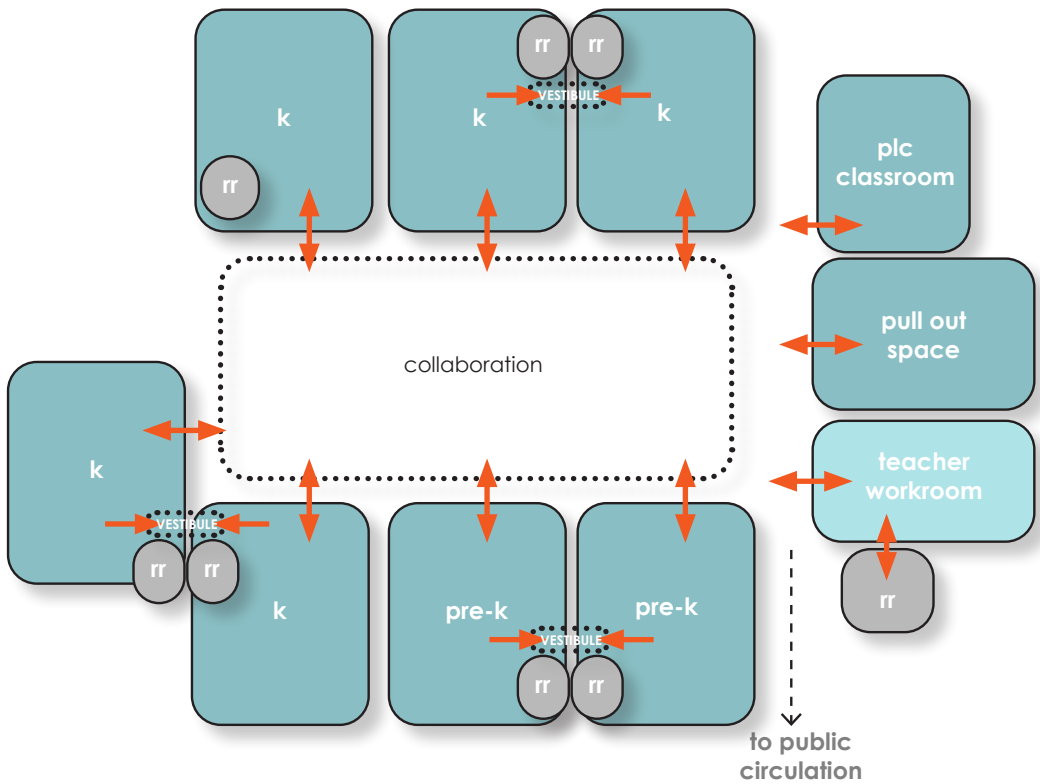

PROGRAM DESCRIPTION

The academic classroom area for elementary schools shall house classrooms for Pre-K through 5th grade. Classroom location with access to outdoor play areas/playgrounds should be included. Pre-K through 1st grade classrooms shall have restrooms provided within the classroom space. Remaining grade levels (2nd-5th) will each have five classrooms with separate boys and girls student restrooms and have visual access between the classrooms and collaboration areas.

Each neighborhood should be grouped around a collaborative learning area and will share a pull out space, teacher workroom, and grade level PLC. This space will allow for large group instruction and/or act as a space for small groups to work together. Outdoor learning and play areas will be provided at the campus.

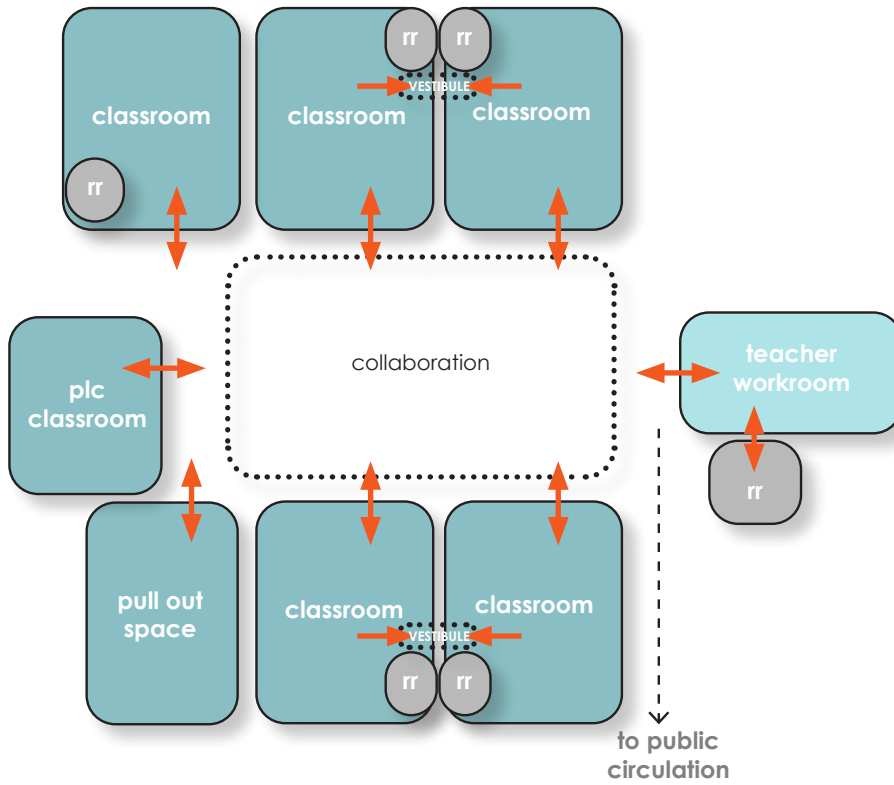

Instructional spaces should be as transparent as possible so that students, staff, and guests can see the learning ecosystem from space to space and grade level to grade level.

SPECIAL EDUCATION SPATIAL RELATIONSHIPS & ADJACENCIES

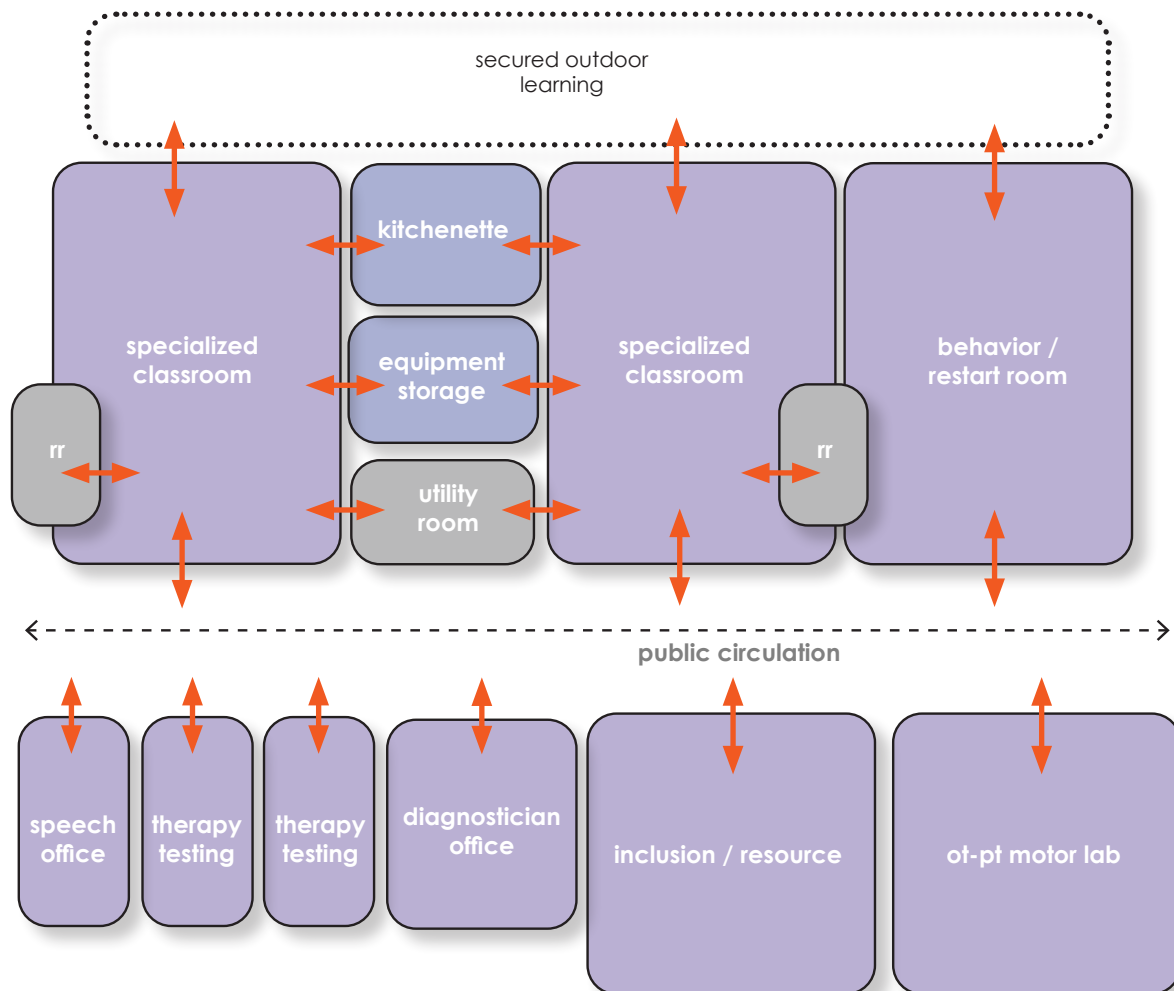

PROGRAM DESCRIPTION

Special education classrooms are centers of activity as students work on projects, collaborate with others, and learn/practice personal life-care. Spaces should be flexible so that teachers can easily adjust furniture and equipment based on the needs of the students, and special education classrooms should be in close proximity to both the bus pick-up/drop-off and the nurses clinic.

While spaces should be transparent so they are a part of the learning ecosystem of the school, special care should be given so that students can be screened from outside viewers.

Special needs education students must be provided the least restrictive environment for the individual education programs; the special needs students need to be integrated with the rest of the student population to the greatest extent possible.

SPECIAL CLASSROOMS SPATIAL RELATIONSHIPS & ADJACENCIES

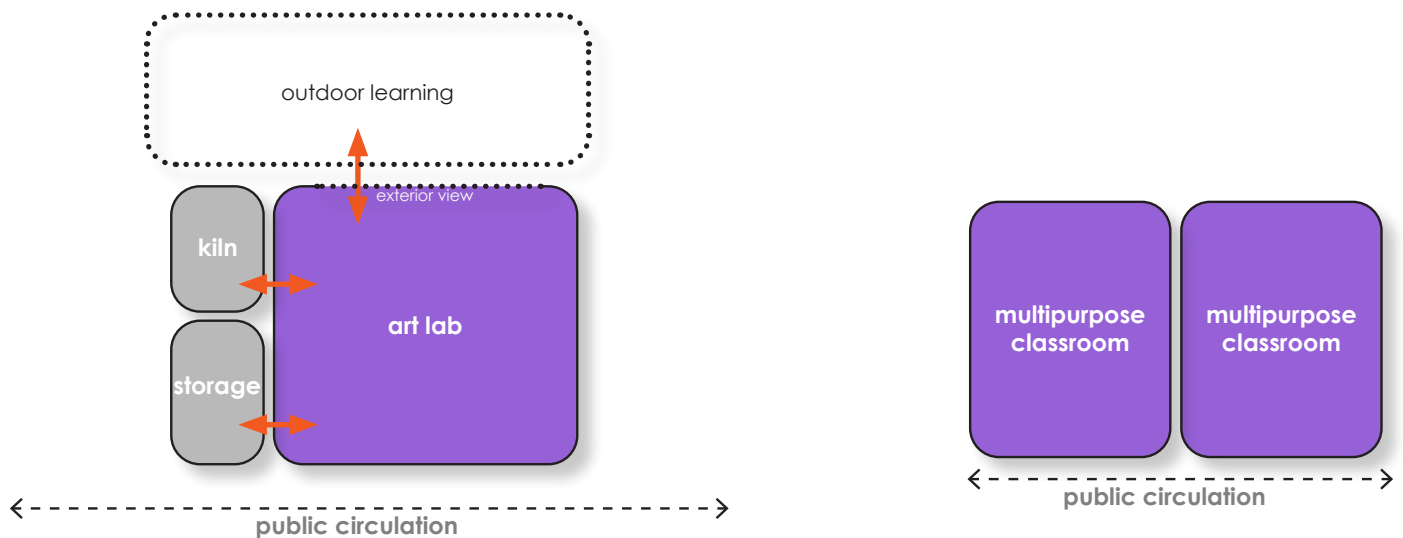

PROGRAM DESCRIPTION

Spaces included as specialized rooms are those outside of general academics such as art and music. In addition, the after-school “Extended Learning Program” (ELP) is included in this section. The ELP is not offered at all campuses, however, if included, the necessary information is provided in this document.

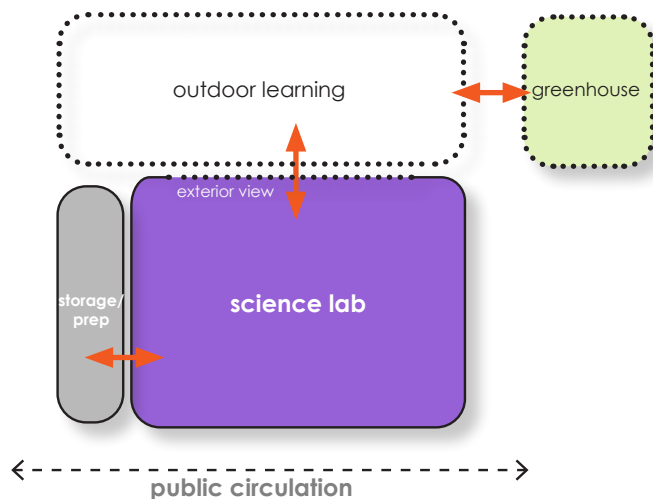

Two multipurpose classrooms should be provided in close proximity to the academic spaces. These rooms should be flexible in seating to accommodate different sizes of groups for lecture/instruction. Special consideration should be paid to each different type of space according to the descriptions included in the educational specifications.

Art and science classrooms should be located to provide a secured outdoor area directly accessible from each classroom. This outdoor space could be shared between art and science.

Outdoor Field (Grass Play Area)	1		

ATHLETICS / PHYSICAL EDUCATION SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

The gymnasium and athletics space of the school provide an indoor facility for physical education and indoor instructional programs. The gymnasium is also used for large group instruction and is used by students and the community after school hours. Outdoor physical education areas should be located near the indoor gymnasium, covered play area, walking tracks, associated play fields, and playgrounds to the extent possible for ease of access.

Physical education facilities should be designed and constructed with a focus on community use during non-school hours since there is a high demand for both indoor and outdoor facilities. This will be accomplished by locating an entrance near the gym with lockable doors to control access to the rest of the building.

NOTES

1. Provide walk-out roof access when possible.
2. Quantity of IDF rooms may vary, depending on the layout of the school

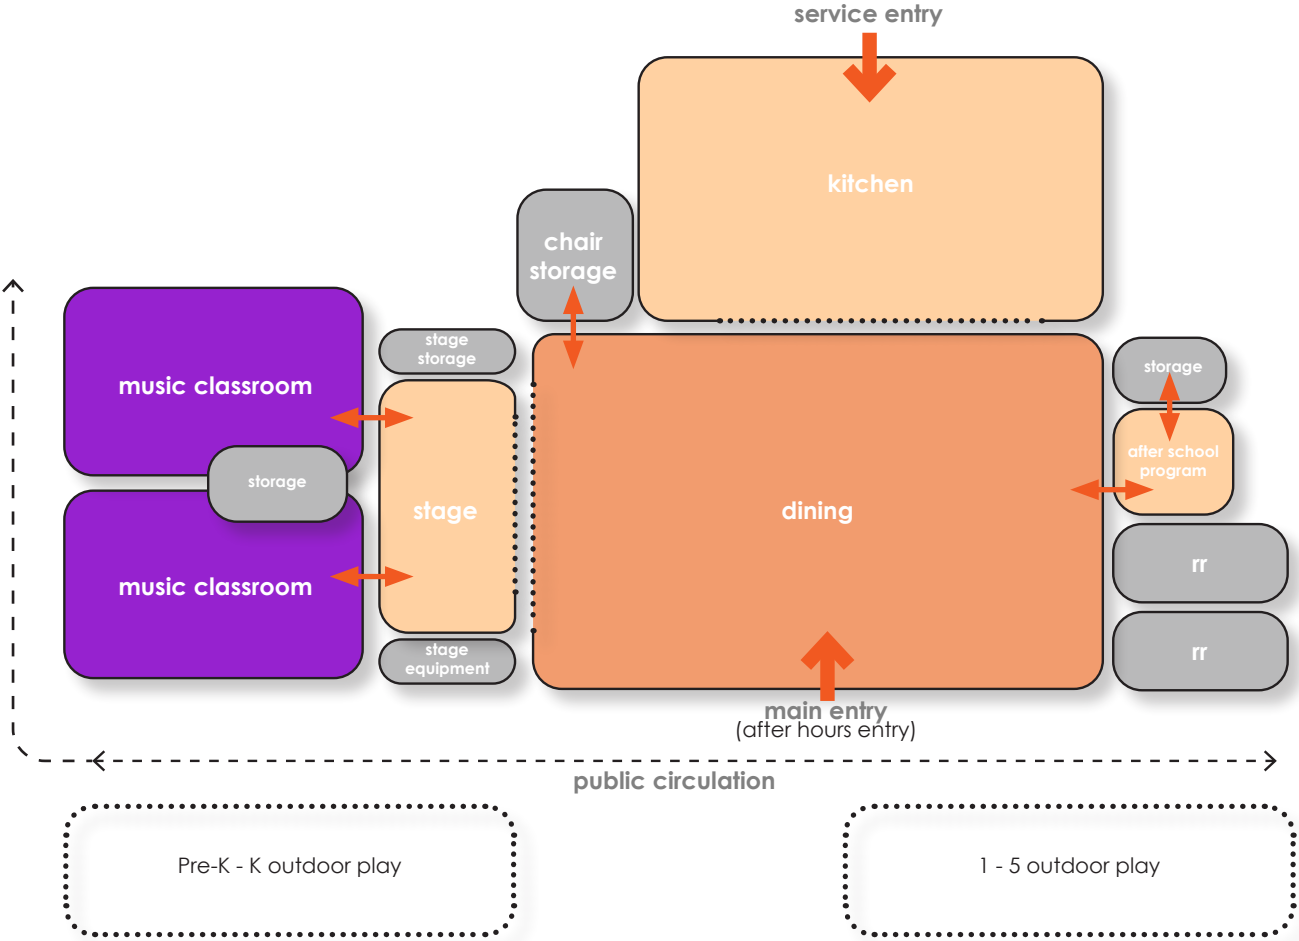

CAFETERIA / KITCHEN / ANCILLARY SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

The dining area is a gathering spot for students in the morning as they are dropped off for school, where breakfast and lunch are served, and a gathering spot for the community as they watch elementary school programs and events. As such, the dining area should be flexible in its arrangement and be oriented towards a stage/performing area.

Kitchen space includes serving lines, cooking/prep areas, as well as storage and main custodial spaces. Restrooms shall be provided near/adjacent to the dining space. Music and stage are also located near the cafeteria space. Serving and kitchen spaces should be designed in conjunction with a Food Services Consultant. Stage and chair/table storage are also located within the cafeteria/commons area.

KITCHEN DIAGRAM

NOTES

Kitchen design is beyond the scope of these Educational Specifications.

Notes for the kitchen designer:

1. All disposable serving ware.
2. OFOI digital menu boards (content provided by Nutrislice service).
3. Elevated loading dock not required.
4. Loading doors and storage doors shall be 3'-6" or 4'-0" wide.
5. Kitchen laundry is handled by a service, no washer/dryer required.
6. Include TAS dressing bench in locker vestibule.
7. Manager's office should have two workstations, one for manager and one for computer based training. Built-in furniture is okay.
8. Locate time-clock near loading door, not inside manager's office.
9. Serving line lighting 5000K color temperature.
10. Can wash is used by building custodial, not kitchen staff.
11. Kitchen and serving line flooring is polished concrete. OFOI mats at high slip risk areas.
12. Roof-mounted refrigeration racks for walk-in and reach-in coolers and freezers.

SPECIAL EDUCATION SPATIAL RELATIONSHIPS & ADJACENCIES

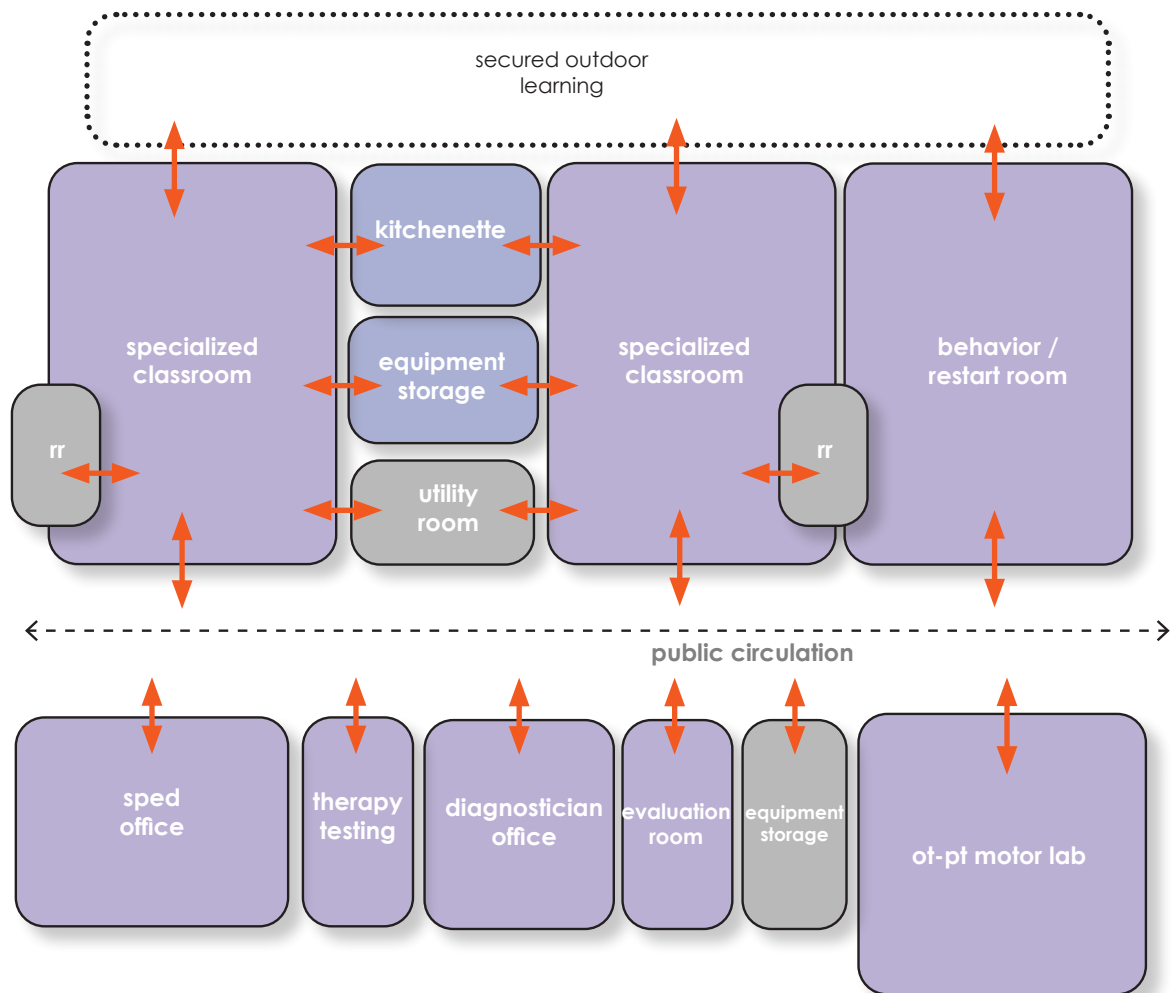

PROGRAM DESCRIPTION

Special education classrooms are centers of activity as students work on projects, collaborate with others, and learn/practice personal life-care. Spaces should be flexible so that teachers can easily adjust furniture and equipment based on the needs of the students, and special education classrooms should be in close proximity to both the bus pick-up/drop-off and the nurse's clinic.

While spaces should be transparent so they are a part of the learning ecosystem of the school, special care should be given so that students can be screened from outside viewers.

Special needs education students must be provided the least restrictive environment for the individual education programs; the special needs students need to be integrated with the rest of the student population to the greatest extent possible.

CTE AREA SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

CTE programs at middle schools need to be future focused and allow students the opportunity for exploration of careers and work related skills.

Career and Technical Education (CTE) programs within Ector County ISD provide a variety of courses in many career pathways. Included at middle schools are college career explore, technology labs, data entry labs, robotics, and computer science.

CAFETERIA / KITCHEN / ANCILLARY SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

The dining area is a gathering spot for students in the morning as they are dropped off for school and a gathering spot for the community as they watch programs and events. As such, the dining area should be flexible in its arrangement and be oriented towards a stage/performing area.

Kitchen space includes serving lines, cooking/prep areas as well as storage and main custodial spaces. Restrooms shall be provided near/adjacent to the dining space. Music and stage are also located in close proximity to the cafeteria space and are addressed in the fine arts section of the Educational Specifications. Serving and kitchen spaces should be designed in conjunction with a Food Services Consultant. Stage and chair/table storage are also located within the cafeteria/commons area.

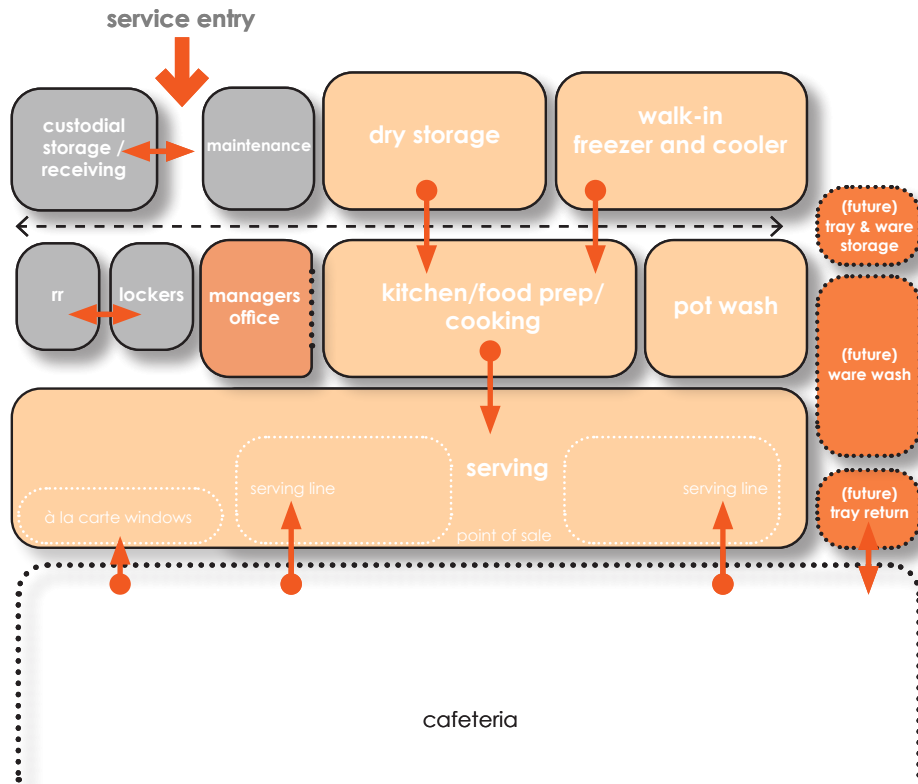

CAFETERIA / KITCHEN DIAGRAM

This page intentionally left blank.

CAFETERIA / KITCHEN / ANCILLARY SPATIAL RELATIONSHIPS & ADJACENCIES

KITCHEN DIAGRAM

NOTES

Kitchen design is beyond the scope of these Educational Specifications.

Notes for the kitchen designer:

1. All disposable serving ware.
2. OFOI digital menu boards (content provided by Nutrislice service).
3. Elevated loading dock not required.
4. Loading doors and storage doors shall be 3'-6" or 4'-0" wide.
5. Kitchen laundry is handled by a service, no washer/dryer required.
6. Include TAS dressing bench in locker vestibule.
7. Manager's office should have two workstations, one for manager and one for computer based training. Built-in furniture is okay.
8. Locate time-clock near loading door, not inside manager's office.
9. Serving line lighting 5000K color temperature.
10. Can wash is used by building custodial, not kitchen staff.
11. Kitchen and serving line flooring is polished concrete. OFOI mats at high slip risk areas.
12. Roof-mounted refrigeration racks for walk-in and reach-in coolers and freezers.

CAREER, TECHNOLOGY AND ENGINEERING SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

CTE programs at high schools need to be future focused and allow students the opportunity for exploration of careers and work related skills.

Career and Technology Education (CTE) programs within Ector County ISD provide a variety of courses in many career pathways.

STUDENT DINING SPATIAL RELATIONSHIPS & ADJACENCIES

PROGRAM DESCRIPTION

The dining area is a gathering spot for students in the morning as they are dropped off for school and a gathering spot for the community as they watch programs and events. As such, the dining area should be flexible in its arrangement.

Kitchen space includes serving lines, cooking/prep areas, as well as storage and main custodial spaces. Restrooms shall be provided near/adjacent to the dining space. Serving and kitchen spaces should be designed in conjunction with a Food Services Consultant. Stage and chair/table storage are also located within the cafeteria/commons area.

STUDENT DINING SPATIAL RELATIONSHIPS & ADJACENCIES

KITCHEN DIAGRAM

NOTES

Kitchen design is beyond the scope of these Educational Specifications.

Notes for the kitchen designer:

1. All disposable serving ware.
2. OFOI digital menu boards (content provided by Nutrislice service).
3. Elevated loading dock not required.
4. Loading doors and storage doors shall be 3'-6" or 4'-0" wide.
5. Kitchen laundry is handled by a service, no washer/dryer required.
6. Include TAS dressing bench in locker vestibule.
7. Manager's office should have two workstations, one for manager and one for computer based training. Built-in furniture is okay.
8. Locate time-clock near loading door, not inside manager's office.
9. Serving line lighting 5000K color temperature.
10. Can wash is used by building custodial, not kitchen staff.
11. Kitchen and serving line flooring is polished concrete. OFOI mats at high slip risk areas.
12. Roof-mounted refrigeration racks for walk-in and reach-in coolers and freezers.
