EVALUATION OF SUPERINTENDENT

The Board of Education recognizes that student growth, district progress, and community satisfaction are all affected by the performance of the Superintendent of Schools. The Superintendent cannot function effectively without periodic feedback about his/her performance. Therefore, the Board recognizes its responsibilities to evaluate the Superintendent.

The Board shall develop procedures, in consultation with the Superintendent, to review annually the Superintendent's performance. The final plan adopted shall be within the sole discretion of the Board. Such evaluation will be discussed only during an executive session. The evaluation process is intended to provide the highest quality leadership for the school system. Such procedures shall be available for review to any individual no later than September 10th of each year.
