CURRICULUM GUIDES AND COURSE OUTLINES

The Board of Education encourages the development of curriculum guides and course outlines at all educational levels. These materials shall be reviewed annually and recommendations made by the Superintendent of Schools for revision and modification as necessary and/or required by changes in NYS standards. The curriculum shall be designed to show the developmental sequence of content and skills.

State Education Department standards provide the guidelines for curriculum development. Professional resources (online curriculum software) and established formats for curriculum development (for example, Understanding by Design unit templates) shall be used for writing and sharing curriculum with both professional faculty and the community.

It is a professional responsibility to plan in advance for the instructional program offered to students.

Adoption date: November 22, 1993
Revised: March 3, 2020
