CURRICULUM

Curriculum will be designed to carry out the instructional goals of the district and provide for the continuous intellectual growth of all students. The Board of Education believes that there must be close coordination between curriculum development and instructional processes as well as continuity between educational levels, if instructional goals are to be reached.

To this end, curriculum will be developed by the Superintendent of Schools and submitted to the Board for adoption.

Besides instructional goals, curriculum development by the professional staff shall be guided by such factors as:

1. actual studies and information concerning the needs of students in this district;
2. the range of abilities, aptitudes and interests of our students;
3. aspirations of residents of the school district for our students; and
4. the mobility of our population, making it necessary to provide education for our students which may be useful anywhere in the world.

The Board desires that unnecessary duplication of work among the various school levels be eliminated and that courses of study and syllabi be effectively coordinated.

Whenever feasible, the Board favors providing opportunities for faculty and students to help in curriculum development through such devices as workshops, study groups, assistance from outside consultants, and allowing teachers to devote summer time to the effort.

Adoption date: November 22, 1993
