STUDENT PROGRESS REPORTS TO PARENTS

The Board of Education wishes the professional staff of our schools to devise and maintain a variety of reporting methods keeping each parent apprised of his/her child's progress. It is encouraged that such reports include comments of a positive nature as well as those of a more corrective nature.

In keeping with this wish, periodic progress reports of each individual student's academic achievement shall be posted online to the parent portal, generally three to four times a year. At the secondary level, parents of failing students will be notified mid-way into each marking period or sooner, if appropriate.

The Superintendent of Schools shall oversee the development of specific timelines and guidelines related to the above.
