Budget Development Process

The administration and Board of School Directors are committed to fiscal responsibility and providing the necessary support to effectively meet the educational, technology, and facility goals of the district. These considerations are factored into the budget development process and balanced with the local, state, and federal resources available to the District.

State law requires that each Pennsylvania school district prepare an annual budget for the general fund. This budget serves as the foundation for the district's financial planning and control. Under requirements of Act 1 of 2006, a preliminary budget is required to be developed and available for public review in January, and adopted in February. In lieu of developing a preliminary budget, a district's Board of School Directors can adopt a resolution that it will not raise taxes above the Act 1 index. For the fiscal year 2023-2024, the District's adjusted index is 5.0%. The District's applicable index was 4.1% for fiscal year 2022-2023.

A proposed final budget is presented, made available for public inspection, and adopted in May. The final budget is then adopted in June.

<u>Purpose</u>

The Board considers preparation of an annual budget to be one of its most important responsibilities because the budget is the financial reflection of the district's educational plan. Authority

Revenues

General fund revenues of the District are classified as local, state, or federal sources. Revenues from local sources comprise \$50,710,046 or 71% of the 2023-2024 budgeted revenues. State sources and federal sources comprise 28% and 1% of the remaining budgeted revenues, respectively.

Local Sources

The most significant source of revenue for the District is current real estate taxes. With \$44,454,146 budgeted for the 2023-2024 school year, this comprises 88% of the local source revenues for the District. The general fund budget also incorporates anticipated transfer tax and earned income tax revenue of \$4,124,870, or 8% of local source revenues.

State Sources

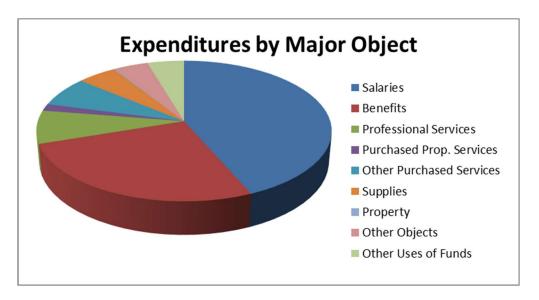

The 2023-2024 budget anticipates \$19,638,268 in revenue from state sources. The majority of state source revenue includes instructional and operational subsidies received from the Commonwealth of Pennsylvania primarily based on weighted average student attendance data and legislated distribution formulas. The District budgeted \$7,253,913 for the basic education subsidy and \$5,295,123 for the state retirement contribution subsidy. These two subsidies make up 37% and 27% of the budgeted state source revenues, respectively.

Federal Sources

The District receives funding through three federal programs, Title I, Title II, Title IV and the School-Based Access Program. These revenues have program specific reporting requirements and are passed through to the District from other governmental entities. The 2023-2024 budget includes \$362,000 for the Title I program accounting for 72% of total federal source revenues.

Expenditures

Budgeted expenditures in the General Fund for the 2023-2024 school year are \$71,679,378 which is an increase of \$2,340,158 (3.3%) from the prior year. As the graph below illustrates, the largest portion of general fund expenditures are for salaries (43.5%) and employee benefits (26.4%). The District is a service entity and, as such, is labor-intensive.

The following table shows the general fund expenditure changes by major object over the preceding fiscal year.

Significant factors that impacted the general fund expenditure budget are as follows:

- Staffing Added five additional full time teaching positions for full-day kindergarten
- Employment Agreements The increased allocation to salary expenditures is reflective of the various agreements with employee groups and is mainly attributable to contractual step movement and cost of living adjustments.
- Retirement system contributions Pennsylvania school districts are required to pay a
 defined contribution percentage of salaries to the Pennsylvania State Retirement
 System (PSERS). The employer contribution rate for the 2023-2024 school year is
 34.00%, which is a 1.62% decrease, representing a \$136 thousand decrease in
 budgeted benefit expenditures over the preceding year.
- Professional Services Increase in special education professional services by an increase of \$406 thousand over the prior year budgeted amount.
- Charter School Tuition The District is expecting a 5.07% increase in charter school tuition. Charter school tuition is a significant unfunded mandated expenditure for the District.

Governance Structure

The Superintendent is the chief administrative officer of the District and is responsible for the administration and operation of the public school system. The central administrative staff performs the daily operations and management of the school district, and are led by the Superintendent, the Assistant Superintendent, the Business Administrator, and the Director of Human Resources, who are appointed by the Board of School Directors.

The following schedule details the organizational structure of the District:

Penn-Delco School District

Approved: 8/22/18

Summary of Significant Accounting Policies

Reporting Entity

Penn-Delco School District (School District) is governed by an elected nine member Board of Directors. As required by generally accepted accounting principles, financial statements present the School District (the primary government). Certain potential component units were assessed to determine if the financial relationship with the School District would require inclusion in the reporting entity.

Basis of Presentation

The accounting system of the School District is organized and operated on the basis of fund accounting with each fund or account group being a separate accounting entity with a set of self-balancing accounts which comprise its assets, liabilities, and fund balance/net position, revenues and expenditures/expenses as appropriate. School District resources are allocated to and accounted for in individual funds based upon the purpose for which they are to be spent and the means by which spending activities are controlled. The various funds are grouped into five fund types within three broad fund categories, as follows:

(i) Governmental Funds:

<u>General Fund</u> is the general operating fund of the School District. It is utilized to account for all revenues and expenditures except those required to be accounted for in another fund.

<u>Capital Projects Fund</u> is utilized to account for the financial resources to be used for the acquisition and construction of capital equipment and improvements in accordance with applicable general obligation bond agreements.

<u>Capital Reserve Fund</u> is utilized to account for financial resources to be used for the acquisition and construction of capital equipment and improvements.

(ii) <u>Proprietary Funds:</u>

<u>Enterprise Fund</u> (Food Service Fund) is used to account for operations (1) that are financed and operated in a manner similar to private business enterprises--where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges or (2) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

(iii) Fiduciary Funds:

Fiduciary Funds are utilized to account for assets held by the School District in a trustee capacity or as an agent for individuals, private organizations, other governmental units and/or other funds. The District accounts for these assets in the scholarship fund and student activities fund. The scholarship fund accounts for donations made to the various scholarship accounts, whose purpose is to provide scholarships to students as described by donor stipulations and the high school scholarship committee. The student activity fund accounts for funds held on behalf of students clubs of the District. Activities are for the benefit the students and occur outside of the normal school day.

Basis of Accounting

Basis of accounting refers to the timing of recognition of revenues and expenditures or expenses in the accounts and in the financial statements, regardless of the measurement focus.

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. All governmental funds are accounted for using a current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in fund balance.

The propriety fund and fiduciary funds are accounted for on a flow of economic resources measurement focus. With this measurement focus, all assets and all liabilities associated with the operation of this fund are included on the balance sheet. Proprietary fund and fiduciary fund type operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in net position.

Modified Accrual Basis

The modified accrual basis of accounting is followed for all governmental funds of the School District. Under the modified accrual basis of accounting, expenditures, other than interest, discount accretion and principal payments on long-term debt which are recorded on their payment dates and the liability for compensated absences which is included in the General fund to the extent that it will be liquidated with expendable available financial resources, are recorded when the fund liability is incurred. Revenues are recognized when they become susceptible to accrual, i.e., measurable and available to finance the School Districts operations. Available means collectible within 60 days after fiscal year-end. The modified accrual basis of accounting is used for the General Fund, Capital Reserve Fund and Capital Projects Fund as follows:

- (i) <u>Revenue from Local Sources</u>: Funds produced within the boundaries of the District and available for use. Primary sources are comprised of tax revenues, intergovernmental revenues, gate receipts and interest income.
- (ii) <u>Revenue from State Sources</u>: State subsidies due the School District as current fiscal year entitlements are recognized as revenue in the current fiscal year even though such funds will be received in a subsequent fiscal year.
- (iii) <u>Revenue from Federal Sources</u>: Federal program funds applicable to expenditures for the same program in the current fiscal year but expected to be received in the next fiscal year are accrued as current revenue at the end of the current fiscal year along with the recognition of the federal funds receivable.

(iv) **Expenditures**:

- <u>Salary and Benefits</u>—Employee salary and benefits are recorded expenditures of the General Fund for employee time worked during the fiscal year. For 10 month professional employees, summer salary and benefits are accrued for at fiscal year-end. This represents the salary and benefits that have been earned, but not paid out for these employees and is a liability to the district.
- <u>Professional Services</u> Professional contracted service expenditures are recorded in the period services were rendered. Services rendered prior to June 30, but not paid until July or August are included in accounts payable at fiscal year-end.
- <u>Supplies</u> Expenditures for supplies are recorded when physically received by the district.
- Other Expenditures for insurance and similar services extending over more than one
 accounting period are accounted for as expenditures during the period of usage.
 Interest and discount accretion on long-term debt are recognized as an expenditure on
 the due date of the payment.

Accrual Basis of Accounting

Under the accrual basis of accounting, revenues are recognized in the accounting period they are earned and become measurable; expenses are recognized in the period incurred. The accrual basis of accounting is used for proprietary funds and fiduciary funds.

Budgets

The School Board approves, prior to the beginning of each year, an annual budget on the modified accrual basis for the General Fund. This is the only fund for which a budget is required and for which taxes may be levied. The Public School Code allows the School Board to authorize budget transfer amendments beginning 90 days after the start of each fiscal year. The School District's management does not have the authority to approve the budget or any budget transfer amendments. The School District expenditures may not legally exceed the revised budget amounts by function and object. Function is defined as a program area such as instructional services, and object is defined as the nature of the expenditure such as salaries or supplies.

Encumbrances

Encumbrances accounting, under which purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration in the General Fund.

Encumbrances outstanding at year-end are reported as reservations of governmental fund balances since they do not constitute expenditures or liabilities.

Fund Balance

The School District will strive to maintain an unassigned general fund balance of not less than five percent (5%) and not more than eight percent (8%) in keeping with Act 48 of 2003 of the budgeted general fund expenditures for that fiscal year.

The unassigned fund balance shall be that portion of the fund balance which is available for appropriation for expenditure or not legally or otherwise segregated for a specific or tentative future use, projected for the close of the school year for which the school district's budget was adopted and held in the General Fund account of the district.

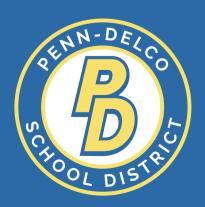

The total fund balance, consisting of several portions including; restricted, committed, assigned, and unassigned may exceed eight percent (8%).

If the unassigned portion of the fund balance falls below the threshold of three percent (3%) of budgeted expenditures, the Board will pursue options for increasing revenues and decreasing expenditures, or a combination of both until 3 percent (3%) is attained.

If the unassigned portion of the fund balance exceeds eight percent (8%) of budgeted expenditures, the Board may utilize a portion of the fund balance by appropriating excess funds for expenditures. The goal is to use any excess fund balance for nonrecurring expenditures and not for normal operating costs.
