

INTERNET SAFETY AND DIGITAL CITIZENSHIP

Internet Safety Vocabulary

Digital Citizen: a member of a worldwide community linked by the internet

Personal Information: information that can't be used to identify you, such as your age, gender, how many siblings you have, your favorite food, etc.

Private Information: information that can be used to identify you, such as your Social Security Number, street address, email, phone number, etc.

Register (online): to enter your information in order to sign up and get access to a website

Cyberbully: using technology tools such as the internet and cell phones to deliberately upset someone else

Ethics: ideas about how people should act and behave

Responsibility Sort

Self	Friends and Family	Community
I get permission to post photos of others	I post my opinions respectfully	I protect my passwords
I keep private information private	I give credit for the information I find online	I stand up to cyberbullying

Things to Remember:

- ✓ Each time you share _____ about yourself online, stop and think: "Am I giving out information that I should keep _____?"
- ✓ Personal information often is safe to share. But you should never share private information without the _____ of a parent or teacher.
- ✓ If someone is _____ to you online, take a breather and ignore them. Save a _____ of your conversation between you and the bully.
- ✓ If you, or someone you know, is cyberbullied, talk to a _____ like a parent, family member, or teacher. Together, you can think of a _____ for how to respond.

Directions: Pretend you have a public profile in an online community. There are people you know and people you don't know who can view your profile. Write down personal information that you would want to share about yourself. Make sure that everything is safe to share and that it is not private information that could reveal your identity.
