What we're seeing.

Researchers have found that for adolescents the covid shut-down “turbocharged anxiety, depression and technology abuse.” “What COVID did was ... revealed the vulnerabilities that were already there, amplified them and was the catalyst to turn them into something more pathological,”

Why Beautiful Me ?

- We recognized an issue and worked as a team to find a solution
- Explored **Beautiful Me** as a means to empower our girls
- Our goal is to build confidence, resilience, and self-esteem

It takes a village...

IMPLEMENTATION

- Female staff participated in introductory **Beautiful Me Teacher Training** on February 28th
- **25** women ***volunteered*** to be certified as Beautiful Me facilitators; held **March 14th & March 21st**
- **3 Hr. Beautiful Me Workshop** for our students held on:
 - **April 5th** - 8th Grade
 - **April 15th** - 7th Grade
 - **May 6th** - 6th Grade

The Workshop

Module 1:

Conversations about internal and external beauty.

Encourage

participants to create and enforce self-generated “rules” for their bodies & their health.

Module 2:

Introduce and foster positive thoughts about each participant’s talents, personality and challenges.

Recognize and **share** the “pleasant” and “unpleasant” aspects of our personalities and behavior.

Module 3:

Meaningful compliments.

Foster the ability to recognize the good in others and share with others.

Practice the ability to receive the meaning and intent of compliments. Introduce the concept of “self-talk”.

== Growing Together

INDEPENDENT EVALUATIONS SHOWS THAT BEAUTIFUL ME IMPROVES GIRLS' SOCIAL AND EMOTIONAL FUNCTIONING.

Developing and improving relationships with others was the most frequently shared impact of Beautiful Me. Specifically, student participants, facilitators and teachers shared that the program had supported girls in getting along better with others, including being more respectful, taking others' perspectives into consideration, being encouraging or supportive to others and helping others. They also expressed that the participants were more outgoing and shared several instances of participants making new friends. In general, several highlight that a sense of belonging, connection and acceptance arose in the group.
