## MARKETING

Marketing & Advertising immerses students into business and marketing projects that are designed to plan, price, promote & place goods and services for current and potential customers.

### In this pathway, students will:

- Learn marketing concepts, terminology, strategies, and advertising.
- Learn graphic design to create logos, business cards advertisements, etc.
- Innovate, prototype, and create original products for their own business.

## TECHNICAL THEATER

The Technical Theater course will focus on the responsibilities of stage management and technical theatre.

### In this pathway, students will:

- Be introduced to theatre appreciation and history through the lens of technical theatre.
- Learn backstage fundamentals such as design, construction, and execution of technical theatre.
- Learn safety, theater terminology, tool handling, properties, sound, scenic construction, and lighting to prepare students to participate in high school and collegiate & professional programs.

## COMMERCIAL MUSIC

The Commercial Music Pathway teaches you about the industry of music recording and how music has evolved and the influences from other cultures into American music.

### In this pathway, students will:

- Understand basic music theory and fundamentals.
- Explain how sound is created and transmitted.
- Edit raw audio for a radio commercial.
- Underscore a short animation/video.
- Analyze music from other cultures and time periods.
- Identify non-performing careers in music.
- Set up a basic home recording studio.
- Record, mix, and edit vocals and instruments.

## MACHINING

The Machining Academy gives students the foundational skills of working in the manufacturing industry.

### In this pathway, students will:

- Create computerized products using SolidWorks and MasterCAM to 3D print prototypes
- Learn CNC programming and machining
- Earn nationally recognized NIMS (National Institute of Metalworking Skills) certifications
- Intern with industry partners as seniors

## HEALTH ACADEMY

All students begin by learning medical terminology and the foundations of health. They are then able to choose an area of concentrated study – Patient Care or Sports Medicine.

## PATIENT CARE

- Students will embark on a First Responders course which results in FEMA and CPR certifications.
- Advancing to the CNA course in preparation for entering into a formal certification program after high school graduation.

## SPORTS MEDICINE

- Be introduced to the world of athletic training and sports therapy.
- They will then move on to Advanced Sports Medicine for more in-depth training and internships.
