

# Device Requirements by Year Group

Year Group	Requirements
Nursery to Year 2	Students will use Tanglin facilities in school. If the school moves to Remote Learning, access to a device with internet connection at home will be required.
Year 3 to Year 6	Students will use Tanglin facilities in school and will require access to a computer at home. If the school moves to Remote Learning, students will bring home a school-owned iPad and will need access to wi-fi at home.
Year 7 to 13	<p>All students must have a pen-enabled device, not a MacBook or gaming laptop. Students can continue using an iPad, similar to those used in Year 6, but with the addition of a keyboard and Apple pencil. At any point in the Senior School, students can start using a Windows 11 pen-enabled device (e.g. the Microsoft Surface Pro) with keyboard and stylus. It is advised students with additional learning needs use a Windows 11 device to have full access to the suite of Microsoft Learning Accelerator tools to better support their learning.</p> <p>A range of iPads are available from Apple to suit a wide variety of budgets. They can be purchased with either an Apple or 3rd party keyboard and stylus. There are many manufacturers of Windows 11 pen-enabled devices, several of which offer student discounts, that can be purchased directly from their website or through an electronics store.</p> <p>Students should install Microsoft Teams, OneNote and Outlook onto their devices before their first day at school.</p>
