

# Phishing...

# Don't Take the Bait!

## What is phishing?

Phishing is the process of attempting to get sensitive information such as usernames, passwords and credit card details by disguising as a trustworthy entity.

## How can I avoid it?

Check for spelling mistakes or bad grammar

Hover over a link before you click

Never share **personal information** over email

Don't open unexpected **attachments**

Beware of **urgency**, threats or fear-based phrases

Check email address of senders- don't trust **display names**

Be cautious of emails that offer "**special deals**" or offers that seem too good to be true

Don't enter **passwords** after following links in an email

If it is suspicious, **contact the sender** via another means

**Report and delete** any suspicious emails
