

How Students Log in to DreamBox on a Computer

Before a student can begin learning with DreamBox, they need to log in to their account. A student's login method will depend on your school's preferences. If your school uses a Single Sign-On portal, such as Clever, students will log in to DreamBox by accessing your school's portal. Otherwise, your school will have a unique DreamBox website address that students will use to log in to DreamBox.

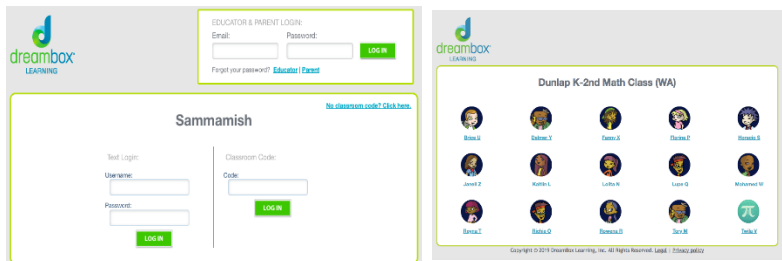

LOGGING IN USING YOUR DREAMBOX LOGIN URL

1) Open an internet browser on your student's computer or laptop.

2) Navigate to your school's unique DreamBox login web address (URL). If you do not know your school's URL, you can find it on your Insight Dashboard under the classroom name in the Reports view. You or your IT department may also [set this bookmark](#) for you students.

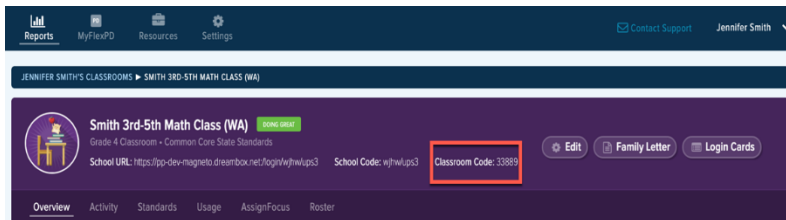

3) The school DreamBox login page will open. The teacher/parent Email and Password fields will be at the top-right of the page, but students will log in with their **5-digit numeric classroom code if they have a Picture Password**, or with their **username and password if they have a Text Password**.

Students with a **Text Password** will automatically be logged in with their username and password. Students with a **Picture Password** will also need to select their student avatar. After selecting their avatar, students will select their **Picture Password** from the nine options.

WHERE CAN I FIND A CLASSROOM CODE?

Teachers can find their classroom code on the Reports pane next to their school code. Or, teachers can find classroom codes on a student's login card. It is also included in the parent letter. Administrators can access a list in the Reports pane in the upper right corner.
