Hannah Cardwell

Special Services Department

I'm interested in middle school because it's such an age of growth and independence for the students, and being a trusted adult on that adventure with them is exciting. Also the TikTok references - they're my people.

Jordan Clawson

8th grade English/Language Arts

I am interested in working with middle school students because I had a wonderful middle school experience, and I would like to share that with others and ensure that they have the same positive experience that I was given.

John Duhan

Band Director

Middle school is an exciting moment for students and teachers alike as they are advancing their capabilities and becoming young adults while still maintaining a youthful excitement and open mind for learning new skills.

Leah Jones

8th grade School Counselor

I am interested in working with Middle School students because I remember and understand how critical this time is for these students. They are beginning to figure out who they are while experiencing major physical, cognitive, and emotional transitions; and I am excited to help them through this process.

Daysia Mims

Spanish

I am interested in teaching middle school students in particular because this group of students at this age are facing some of the most difficult years of their lives. Even if they aren't as passionate about Spanish like I am, I want to be able to influence this group of students in positive way as well as give them a safe place to be themselves and learn in a positive environment.

Latriya Spain

6th grade School Counselor

I am interested in working with Middle School Students because I am aware of the unique needs of "the middle school student". Middle School can be a challenging time along with a lot of transitions for our students. As a school counselor, I can help my students with exploring, navigating, and addressing these challenges by fostering tools and skills to help them succeed.
