

SEEKING EDUCATORS

to review statewide
assessments for alignment
to the academic standards
and represent all
Minnesota students.

Collaborate with other educators to review test content to ensure the Mathematics, Reading, Science and Alternate Minnesota Comprehensive Assessments (MCAs) are aligned to the academic standards, are grade-level appropriate, and reflect the rich diversity and experiences of Minnesota students.

Educator Review Committees meet virtually 1–5 days throughout the year. Participants will be paid an honorarium for their participation or reimbursed for a substitute. Additionally, participants are eligible to receive a lunch reimbursement.
