

Ocean View School District

Measure R Bond Update

Phase I

November 7, 2017

Community relations encourage public support and understanding of the Ocean View School District (OVSD).

Provide update of Measure R Communication Plan

- Phase I College & Westmont Modernization
 - Goals
 - Objectives
 - Strategies
 - Guiding Principles

Goals of Measure R

4

- Improve student safety & campus security
- Ensure current health & safety standards are met
- Upgrade school facilities to current building codes

Objectives of Measure R Outreach

5

- Increase opportunities for public input and response (two-way communication)
- Increase opportunities to share district information with community
- Increase opportunities for community members to interact with OVSD

Strategies of Measure R Outreach

6

- School Board Meetings
- Provide District representation for community programs, organizations
- Official OVSD web site & social media
- Engagement with internal & external stakeholders

Guiding Principles of Measure R Outreach⁷

Measure R modernization projects communication plan is based upon five guiding principles under which we will operate and for which we will be accountable to our community.

Guiding Principles of Measure R Outreach⁸

	Guiding Principle	Rationale
1	Every member of our community is a stakeholder.	At one time or another everyone in our community will have contact with OVSD or will be affected by our decisions. Therefore, on issues of broad public concern, we will look for appropriate opportunities to engage interested stakeholders (individuals and groups from our community).
2	We will consider the community's perspectives.	The Board strives to routinely inform the community about key system decisions including planning and policy. The community's perspectives spill over district school boundaries, highlighting the need for partnership, cooperation and collaboration with other agencies (i.e. City of HB), and business partners.
3	We will engage the community in a transparent modernization communication process.	All major decisions have multiple impacts which must be considered. The District's engagement strategy and processes will be grounded in transparency and open communication.
4	We will engage the community with integrity to build trust and credibility.	The District will make reasonable efforts to ensure that community input and recommendations are solicited in time to be fully considered by the Board. We make commitments to the community in good faith.
5	We will complete the circle of engagement.	The District will inform with those involved on how their input was considered in decision-making and will monitor the effectiveness of its engagement processes.

Purpose of Community Forum

9

- To share general design plans for upcoming Measure R modernization projects.
- Invite school families and neighbors to learn about our design plans and progress to date.
- Welcome input regarding modernization designs, including fencing.
