Star View Elementary GATE students

Star View GATE Program

With the support of Principal Kraft and teacher Tony Dybas, 3rd and 4th grade Star View GATE students from Mrs. Olquin's class shared two of their recent classroom projects with the Board. The first activity, The Wallet Project, was an exercise from Stanford University Design School that guides students through the process of designing a wallet for their partner. Students first brainstormed what their ideal wallet would entail. Next, they interviewed their partner to find out what important things they would store in a wallet and how a wallet would function in their daily lives. Students then revisited their original design, made adjustments, and built a prototype.

In the second activity, students introduced one of their new robots, Dash, to the Board and audience. They demonstrated how even though they wrote two different algorithms, Dash created the same quadrilaterals.

Week of the Employee

The Board approved Resolution #20:2122 designating May 9-13, 2022, as "Week of the Employee" throughout OVSD in recognition of the significant contributions and dedication of our valued certificated, classified, and administrative staff.
