

Special Board Meeting

January 17, 2023

Board of Trustees Identifies District Priorities

Superintendent Dr. Michael Conroy provided the Trustees with his first 120-Day Report, which also outlined the District's future planning priorities and projects for the Board to consider. After presenting his Goals and Goals Focus Area recommendations, each Trustee individually presented their top two priority focus areas; then, the Board collectively prioritized its top two goals focus areas.

OVSD Immediate Priorities

1. Improve academic achievement

OVSD will continue to seek ways to boost academic achievement throughout the District. The Board collectively stated the importance of providing the best Academic Environment and Support for our students and our respective staffs, now and in the future.

2. School consolidation

OVSD is currently operating a number of small schools. The Board will look at consolidating schools for student success and equitable access to District educational programs for all students. This move would ensure more financial stability and the ability to offer a variety of robust programs and electives in our schools, which would improve the overall student experience. A Board School Consolidation Subcommittee, with Clerk Souders as Chair and President Singer as a member, was reestablished as well.

The Board of Trustees did not identify any schools for consolidation. This will occur at a future Board Meeting.
