

Grade Point Average Calculation

A GPA is calculated by dividing your quality points by the number of credits attempted.

A = 4 quality points

C = 2 quality points

B = 3 quality points

D = 1 quality point

F = 0 quality points

Advanced Placement (AP) and Dual Enrollment classes are weighted, meaning they are awarded more quality points for A, B and C only.

A = 5 quality points

C = 3 quality points

B = 4 quality points

D = 1 quality point

F = 0 quality points

Class Name	Credits Attempted **	Final Grade	Quality Points
EX. Pre AP Eng 9	1	B	3

Totals			
	Total Credits		Total Quality Points

Total of Quality Points _____ divided by Total of Credit _____ = GPA _____

***Credits Attempted – If you Fail a class you must still count that as an attempted credit in the calculation even though you did not actually receive the credit due to the “F”.
