To make an appointment call 454-6973 or stop by our school based clinics at Paris Gibson Education Center or Longfellow Elementary

FAST FACTS:

COVID 19 Vaccine Information

Messenger RNA vaccines are some of the first COVID-19 vaccines authorized for use in the United States. Like all vaccines, COVID-19 mRNA vaccines have been rigorously tested for safety. The Food and Drug Administration (FDA) carefully reviews all safety data from clinical trials and authorizes emergency vaccine use only when the expected benefits outweigh potential risks. The Advisory Committee on Immunization Practices (ACIP) reviews all safety data before recommending any COVID-19 vaccine for use

- mRNA Vaccines
 - researchers have been studying them for decades.
 - mRNA vaccines do not contain a live virus and do not carry a risk of causing disease in the vaccinated person.
 - mRNA from the vaccine never enters the nucleus of the cell and does not affect or interact with a person's DNA.
- When can I get vaccinated?
 - Phase 1a: Healthcare workers, long term care facility residents
 - Phase 1b: Essential workers (Education Sector, Food & Agriculture, Utilities, Police, Firefighters, Corrections Officers, Transportation)
 - Phase 1c: Adults with high-risk medical conditions, Adults 65+
- Please do not contact the hospitals or your health care provider with questions about receiving a vaccination. We need to free up their phone lines during this busy time. The Cascade City-County Health Department will keep the public informed and will update you when we move into other vaccine distribution phases.
