**REASONS
WHY FIELDTURF IS
THE RIGHT CHOICE**

FieldTurf®
A Tarkett Sports Company

THE ULTIMATE
SURFACE EXPERIENCE

THE WORLD LEADER IN ARTIFICIAL TURF

TOP REASONS

Since the very beginning, we have developed a reputation for setting quality and innovation standards that continue to revolutionize the artificial turf industry. Our competitors will try to convince you that their products are better with features that are not proven to yield the same long-term performance results that are associated with the FieldTurf system.

Here are the Top 10 Reasons why FieldTurf continues to be the #1 choice at all levels of sport.

1

– for the highest performance

On natural grass, athletes cut, plant and release in the earth. Not on the blades of grass. On FieldTurf's artificial turf it's exactly the same. Our infill is the "artificial" earth, with the same bio-mechanical properties as natural grass. Just like on natural grass, athletes cut, plant and release in our infill. Not on the turf fibers. That's why FieldTurf performs like natural grass and lasts so long.

A typical 2.5" elite full-size FieldTurf field contains 736,000 lbs of infill. That is 496,000 lbs more infill mass than a typical all-rubber field. Testing proves that, unlike FieldTurf's infill system, particles in lightweight infill systems tend to easily migrate in the rain, creating divots and changes in the infill levels. This infill variation significantly impacts the safety of the turf system.

The FieldTurf Patented Infill System:

- The bottom layer is comprised of clean, washed silica sand to stabilize and support the entire system.
- Numerous passes of a mix of similarly sized rubber and silica sand are then layered into the system. The rubber and sand particles are a similar size to stay in suspension.
- Larger-sized cryogenic rubber top layer ensures that the rubber remains on top, providing a safe, forgiving surface.
- Total infill exceeds 9 pounds per square foot on a typical sports field. The FieldTurf infill mix allows for optimal safety and playability.

Silica Sand

Cryogenic Rubber

THE WORLD LEADER IN ARTIFICIAL TURF

2

– for the health of your athletes

Our focus on safety has led to numerous injury reducing innovations and improvements. The main reason that FieldTurf continues to outperform all other turf systems in reducing injury, is our patented sand/rubber layered infill system.

The findings of long-term testing programs show that FieldTurf is safer than any other synthetic turf system and equal to – if not better than – natural grass in most critical areas of player safety. No other company can make this claim.

A three-year study of competitive high school football found that as the artificial infill surface weight decreased, the incidence of game-related high school football trauma significantly increased across numerous playing conditions.

Some of the key differences found are as follows (p/sq.ft = pounds per square foot):

Concussion Injuries Combined

- 8.3% lower incidence of injury between FieldTurf >9 p/sq.ft and 3-5.9 p/sq.ft of infill weight

Total Injuries

- 20.5% lower incidence of injury between FieldTurf >9 p/sq.ft and 3-5.9 p/sq.ft of infill weight

Severe Injuries

- 16.8% lower incidence of injury between FieldTurf >9 p/sq.ft and 3-5.9 p/sq.ft of infill weight

College Football Safety Study Results:

Incidence, Mechanisms, and Severity of Game-Related College Football Injuries on FieldTurf Versus Natural Grass (A 3-Year Prospective Study)

Michael C. Meyers, PhD, FACSM
From the Department of Health and Human Development,
Montana State University, Bozeman, Montana.

- 12% Fewer Concussions
- 40% Fewer ACL Injuries
- 20.6% Fewer Severe Injuries
- 31.4% Fewer Ligament Tears

Source: The American Journal of Sports Medicine, Vol. 38, No. 4, 2010

High School Football Safety Study Results

Incidence, Causes, and Severity of High School Football Injuries on FieldTurf Versus Natural Grass (A 5-Year Prospective Study)

Michael C. Meyers, PhD, FACSM, and Bill S. Barnhill, MD
From the Human Performance Research Center, West Texas A&M University, Canyon, Texas, and
Panhandle Sports Medicine Associates, Amarillo, Texas.

- 44% Fewer Concussions
- 33.4% Fewer ACL Injuries
- 26.6% Fewer Severe Injuries
- 33.4% Fewer Ligament Tears

Source: The American Journal of Sports Medicine, Vol. 32, No. 7, 2004

Women's College Soccer Study Results:

Incidence, Mechanisms, and Severity of Match-Related Collegiate Women's Soccer Injuries on FieldTurf and Natural Grass Surfaces (A 5-Year Prospective Study)

Michael C. Meyers, PhD, FACSM

- 22% Fewer Total Injuries
- 7% Fewer Substantial Injuries
- 2% Fewer Severe Injuries
- 12% Fewer Concussions
- 18% Lower ACL and Associated Tissue Trauma Combined

THE WORLD LEADER IN ARTIFICIAL TURF

3

– for optimal playability

Our fibers are produced at our very own facility in Germany. This state-of-the art facility was opened in 2010 and as a result, has turned FieldTurf into one of the most vertically integrated companies in the world. The quality control process at the facility includes stringent testing of the yarn properties (tensile strength, uniformity, color verification).

Our sports turf systems are constructed with meticulous fiber design, aiming to serve the needs of different customers.

No matter which fiber system you choose, FieldTurf's products are all high quality and can serve any preference.

4

– for maximum drainage

FieldTurf's patented backing offers drainage performance unequaled by any artificial turf product in the industry. A FieldTurf field is designed for all-weather playability.

Unlike the rest of the industry, the innovators at FieldTurf came up with a superior drainage solution for its Elite system. It's called SureLock coating. This patented system coats only the rows of fiber, leaving the rest of the carpet untouched and naturally porous.

Strong Fiber + SureLock Coating = Solid Tuft Bind

Our patented SureLock coating system leaves the backing 40% porous for unmatched drainage and contributes to the highest performing tuft bind in the industry. Other products can randomly achieve good tuft bind but no one else can do it with the same level of consistency as FieldTurf.

THE WORLD LEADER IN ARTIFICIAL TURF

5

– for all sports and all levels

FieldTurf has long been the #1 choice for all sports and all levels. FieldTurf's safety, performance and durability levels are far superior to any other system. As the world's largest synthetic turf company, you will find FieldTurf in many major stadiums. There are no differences between a field installed at a high profile venue and one installed in a small town. For every professional or college field we build, we install the same quality field at 150 high schools and municipalities.

FieldTurf is extremely proud of the following accomplishments in the world of sports:

- 21 of 32 NFL teams have chosen to play / practice on FieldTurf
- 100+ NCAA football programs have FieldTurf
- 30+ NCAA baseball programs choose FieldTurf
- 30+ NCAA soccer programs have opted for FieldTurf
- 15 Pro soccer teams play / practice on FieldTurf
- 1000s of high school and municipal sports installations
- Over 7500 fields installed

6

– for customer security and satisfaction

FieldTurf has brought "single source responsibility" and quality to the forefront with its own manufacturing plants and quality control standards. Integrated, vertical manufacturing has paved the road toward true innovation and customer security, with fiber manufacturing, tufting, coating and testing all done in-house in FieldTurf plants. Installation is done by trained and certified FieldTurf installers.

FieldTurf is the only artificial turf company on the market to meet the most rigorous and comprehensive quality control standards:

- ISO certified manufacturing plants
- In-house fiber manufacturing
- In-house coating of all turf products
- In-house testing of each turf roll and its tuft bind
- Testing of infill and the verification of its grade
- Installation by FieldTurf certified installation crews

THE WORLD LEADER IN ARTIFICIAL TURF

7

– for complete peace of mind

FieldTurf was the first company in the industry to offer a third-party insured warranty. And while you'll probably never need to use it, you can rest easy knowing that you're protected by the industry's best warranty in the unlikely event something goes wrong with your artificial turf system.

It's peace of mind that sets FieldTurf apart.

- ☒ Yearly Aggregate Claim Limit of \$32,000,000
- ☒ Per Claim Limit of \$32,000,000
- ☒ All fields are automatically covered upon issuance of the Warranty Certificate
- ☒ No deductible
- ☒ Prepaid for 8 Years

Through Tarkett, in operation since 1872, FieldTurf enjoys the strongest equity base in the entire industry. FieldTurf's Bonding Capacity of over \$75,000,000 is proof of the financial strength of a company with over 130 years of experience in the surfacing business.

8

– for a stronger field

FieldTurf does not cut corners when it comes to the installation of artificial turf fields.

In order to lower their prices, many competing companies will cut corners on important installation procedures. This severely compromises the durability of the entire field.

It is critical to demand proper installation standards:

- ☒ Sewn Seams = No Trip Hazards
- ☒ Meticulous Fiber Shearing = No Cuts
- ☒ Precision Infill Layering = A Safe Surface
- ☒ Experienced Installation Crews = Quality Assurance

THE WORLD LEADER IN ARTIFICIAL TURF

9

– for a better investment

Since its inception, FieldTurf has proven to be the most durable and longest-lasting synthetic turf system in the marketplace having installed more fields that are currently 8 years or older than all other competitor installations combined.

The FieldTurf system is not just marketing spin. It has been carefully engineered by athletes, for athletes to not only perform at the highest of levels but to do so for longer than any other turf product.

FieldTurf Fields Perform - Year After Year

10

– for your FieldTurf experience

FieldTurf does not sever its customer relations once the contract has been signed. We take the time to follow up with each and every one of our customers in order to ensure complete and consistent customer satisfaction. Our professional customer service agents are always ready to assist with any issues relating to your FieldTurf field. Whether your request is placed by phone or through email, our customer service department guarantees fast and effective solutions for all your field care needs.

Customer satisfaction remains FieldTurf's number one priority.

Every FieldTurf employee is graded on his/her performance in relation to our customers and it is a central point of focus for the development of FieldTurf as a company. We have implemented company-wide measures to guarantee complete customer satisfaction.

FieldTurf®
A Tarkett Sports Company

THE ULTIMATE
SURFACE EXPERIENCE

THE LONGEST LASTING TURF. PERIOD.

Longest-Lasting Performance

Since its inception, FieldTurf has proven to be the most durable turf system in the world, with more fields that are 8 years or older than all other competitors combined. All of FieldTurf's components are made from the highest quality materials. FieldTurf fields are manufactured and installed with a level of attention to quality control that has changed the industry forever. No other artificial turf manufacturer in the world can measure up.

Detroit Country Day School Selects FieldTurf Again, After First Field Lasts Thirteen Years!

Detroit Country Day School also chose to install FieldTurf in their impressive new indoor athletic complex that will serve the football, boys and girls soccer, boys and girls lacrosse and field hockey teams.

"We looked at many different products in the industry and the same holds true today as it did more than a decade ago – nothing in the marketplace compares to what the FieldTurf product offers in terms of safety and playability. When we originally decided to install FieldTurf on our Stadium Field, we expected an excellent level of service and product and that is exactly what we experienced over the last 13 years. We are excited to continue our longstanding relationship with the world leader in artificial turf."

Glen Shilling - Headmaster, Detroit Country Day School

Detroit Country Day School, MI

"For the last 8 years FieldTurf has been part of Wesley College athletics and we could not be more satisfied with our decision. Over this time, our 47-3 home record is not only a testament to our players and coaches, but also to the surface we play on - FieldTurf."

Mike Drass - Athletic Director and Head Football Coach, Wesley College

Keys To A Long-Lasting Turf System

There are 4 keys to a long-lasting turf system - a durable fiber system, high quality infill materials, proper infill depth and strong seam technology.

1 Durable Turf Fibers

While an artificial turf system's infill performs well for up to twenty years, it is the fiber system that wears first. Finding a durable fiber system is key when selecting your turf system. Independent testing on the durability of various fiber types is available at Penn State University. For more information on the study, contact your FieldTurf representative.

2 High Quality Infill Materials

Low grade rubber materials can cause premature wear of a turf field. There are two types of rubber material - high grade cryogenic rubber and low grade ambient rubber. Cryogenic rubber works to promote effective and consistent drainage by eliminating the potential for migration caused by water. The cryogenic rubber's smooth and rounded shape facilitates a consistent flow of water through the infill without raising and displacing any rubber. The loose and jagged rubber strands found in ambient rubber make it vulnerable to migration and floatation caused by the air bubbles in water.

3 Proper Infill Depth

Infill depth will ensure proper playability and longevity of the fiber, while also maintaining a grass-like appearance. The infill is the athlete's source for cutting, planting, shock absorption and energy restitution. The critical mistake regardless of the type of infill used, is the under filling or over filling of the turf system.

Proper Infill Level: Infill at approximately 2/3 (two-thirds) depth of the fiber height will provide the necessary fiber support for a longer lasting field along with less maintenance and a very minimal amount of infill displacement.

Over Filled: Too much infill depth in a turf system leads to rooster tails following ball roll and running, along with the potential for severe infill displacement.

Under Filled: An infill level that is too low can cause wrinkling and/or buckling of the turf surface and fails to protect the turf fibers from premature wear and abrasion.

4 Strong Seam Technology

When it comes to the longevity of field seams, there is only one answer - FieldTurf's heavy duty sewn seams. Simply put, glued seams will not stand the test of time. The number one maintenance problem associated with synthetic fields is that of loose unglued turf seams. Glued seams may be easier to install and less expensive as they require no special equipment or expertise. But sewn seams are the only way to ensure a trouble-free seam and a long lasting, safe field. FieldTurf's panel seams are sewn with a double lock stitch. FieldTurf fields do not experience seam problems because FieldTurf settles for nothing less than the best materials and most thorough seam installation.

"The FieldTurf product that was installed in 2011 has performed well especially considering the increase in stadium events, specifically soccer matches and concerts. The new field will offer the field maintenance crew an outstanding and extremely durable product to meet the requirements of each event."

Peter McLoughlin, President
Seattle Seahawks

"We are thrilled with our Revolution 360 field. After comparing the available products in the industry, we felt that FieldTurf's Revolution 360 system clearly stood apart from the rest. It offers us a natural and consistent playing surface. You can feel that you're playing on a premier product. From installation to customer service, FieldTurf has delivered on all their promises."

Charlie Dodds, President
YSC Sports – Philadelphia Union Academy

"We are extremely excited to have a new playing surface in the Sun Bowl that will be safe for players and opponents. We're also ecstatic about having the same exact playing surface on our practice facility at Glory Road."

Sean Kugler, Head Football Coach
University of Texas at El Paso

"We have been playing on FieldTurf for 9 years - the surface and company has delivered at the highest level. When it came time to replace our field, it was an easy decision to choose FieldTurf again. The new Revolution 360 system has impressed our entire organization - from the coaching staff, to the players - we all love it and are proud to be one of the first to install it."
