September 22, 2023

Dear Families and Community Members,

On behalf of Wilson County Schools, I encourage you to review our district's 2022-2023 North Carolina School Report Card. The report card includes data about the district as a whole and also highlights our individual schools.

Wilson County Schools achieved an increase in overall proficiency of 5.4% compared to last school year. For the 2022-2023 school year, students scored 55.2% proficient overall compared to 49.8% during the 2021-2022 school year. This increase in proficiency helped propel Wilson County Schools past 15 other districts in the overall state rankings to number 41 (out of 115 districts in the state). This state ranking is the highest Wilson County Schools has ever achieved. After returning to in-person learning for two school years, our growth scores indicate the tremendous impact our teachers have had on our student's success. Growth is a measure based on achieving one year's worth of learning for students. Twenty-one out of 25 schools met or exceeded growth this year (9 exceeded). Wilson County Schools is only 4.4 percentage points away from being one of the top 20 school districts in the state.

While we are always excited about our great results, I want to emphasize that our students are more than just test scores. We love them and are committed to helping them realize their full potential.

The mission of Wilson County Schools is to provide an educational environment which creates success for all students through the community working together. I want to celebrate the dedication and hard work of every staff member who went above and beyond for students. Our students should be proud of their outstanding performance. Our district has made great progress, and I know it will continue.

Sincerely,

L B. Mill

Lane B. Mills, Ph.D.
