Balloons
Tissue paper (colored)
Bubble wrap
Scraps of cloth
Pool noodle pieces
Table tennis balls
Foam sheets
Cardboard tubes
Binder clips
Egg cartons
Wax-coated sticks
Plastic utensils

STEAM

Dear Parents/Guardians,

This year your child will be participating in various STEAM opportunities throughout the school year in the media center. STEAM stands for Science, Technology, Engineering, Art, and Math. During these opportunities, materials will be needed in order to build and conduct experiments. Most of the items listed on the attached sheet are inexpensive or are items that one can simply begin saving for our program. Any items that you feel you could donate towards our program would certainly be appreciated. You may send materials by your child or bring them in yourself. If you have any questions please contact me at susan.strickland@wilsonschoolsnc.net or 252-238-3639. This list will also be included on our school webpage.

Sincerely,

Susan Strickland
