K-12 Student Wellness & Success/ DPIAA Funding Plan

School District: Oakwood City Schools

District Contact: Allyson Couch

Fiscal Year: 2024-2025

Community Partnership: Montgomery County ESC & South Community Mental Health

Identify Critical Needs

How did you go about identifying the critical needs associated with the Wellness and Success & DPIAA funds?

Oakwood City Schools completes and reviews the One Plan each year determining priority areas of focus. District data and feedback from stakeholders indicate student needs for support with mental health and social-emotional needs. This includes access to quality mental health therapy, coordination of services in the school and home for family support, and alternative education programming.

STAKEHOLDERS: District Leadership Team/ Parent Engagement/ Community Engagement

Research & Select Evidence-Based Strategies

What research and evidence-based strategies are you already using? What research and evidenced-based strategies are you looking into using? Do you need suggestions of evidence-based strategies?

Oakwood City Schools partner with South Community Mental Health for two therapists. The therapists are split between elementary and secondary grade levels. The therapists work with the building counselors to provide mental health services to students. An internal process has been developed to determine student needs and interventions and then make the decision on who should receive counseling.

Oakwood City Schools continue to expand the SEL department. There is an SEL facilitator and SEL interventionist within the district. The SEL support staff are 1.8 FTE. These two support personnel service the entire district. The staff work with parents, mental health professionals, counselors, teachers, etc to ensure that students have the emotional and behavioral supports to be successful in the classroom.
