Report on the progress made in attaining the goals of the wellness policy (REQUIRED):

Nutrition Education: The district has successfully implemented an annual STEM Day event at 2 of the 3 elementary schools. Thru this event Greensburg Salem has connected the community and volunteers to work together along with the food service department to educate our students in aspects of Science. The district also offers special nutrition oriented themed days including a Wellness day. One day each month the Director of Food and Nutrition makes a healthy food samle and offers it to all students to try a new healthy recipe. The goal is to then add that item to the menu and have a more positive acceptance due to having tried it previously.

Nutrition Promotion: We have updated Nutritional signs on all serving lines to encourage all students to take the allowed portion of fruits and vegetables with their lunch daily. This will help them feel fuller longer and help with attention in class.

Physical Activity: Students at the High school and Middle School are required to take a physical education class each year. They are also encouraged to participate in school sponsored activities for example track, football or marching band to increase physical activity. Elementary students are also encouraged to participate in outdoor recess when weather permits.

Other School-Based Wellness Activities: Cafeteria staff attend annual training to stay up to date with regulations and trends in school food service.
