Re: Math Lab Course Offering for 2024-2025

As preparations are underway for the 2024-2025 school year at Bedford North Lawrence High School, we have a new-mathematics course that we can offer to incoming Freshmen. This course is Math Lab and runs as a concurrent course with Algebra 1. Math Lab will provide students with additional opportunities for successful outcomes through Algebra 1.

Math Lab is a one period class per semester and is used as an elective credit for a CORE 40 diploma. Students will benefit from the extra time in the class to master the skills needed to complete the diploma required Algebra 1 course. There will be a limited number of students with the opportunity for this course.

We would like to have information of interest for the Math Lab course by Tuesday, April 30. Please complete the following Google Form as confirmation of this email notification, even if you are not interested in the opportunity. Once we receive the responses we will begin the process for a schedule adjustment for the upcoming school year for those interested in participating in this course.

Please complete the Google Form :
