

Art Room Update

APRIL
2024

WHAT HAVE WE BEEN WORKING ON?

4PK students have been learning the basics of printmaking - making styrofoam plates, coloring them with marker then “magically” making the marker jump onto a piece of paper! **K** students spent some time looking at different pieces of art to notice similarities and differences - then made two pictures of their own to compare! Students in grades 1 and 2 have been continuing to weave, but are now able to use string and yarn to make their creations! **1st** grade students have been learning about color families to make their weavings stand out! **2nd** grade students have been creating a bookmark that they will be able to use once finished! **2nd** grade students also spent some time experimenting with materials while listening to music to try and create artwork the way Vassily Kandinsky did!
