

# TOWN OF PUTNAM

## WATER POLLUTION CONTROL AUTHORITY

### 2024 SPRING FLUSHING EVENT

**Dear Water Customer,**

Please be advised that the Town of Putnam WPCA will be conducting its hydrant flushing event. Hydrant flushing is critical to the maintenance of water quality within the water distribution system's water mains. This event is scheduled to begin on Wednesday May 8, 2024 with unidirectional flushing and then regular flushing will begin on Friday May 10<sup>th</sup> and will continue throughout the water system for approximately one week. Please see below, the day by day flushing plan with dates and streets that we are planning to be flushing.

Please note that during flushing events you will most likely experience periods of discolored water coming out of your taps. It is best that you try to limit water use while flushing is taking place in your area and, flush your water line afterwards by running a cold-water faucet in your residence until the water clears. Your water is safe to drink, the discoloration is caused from iron build up in the water lines being flushed out. Remember, flushing your water system is essential in maintaining water quality and preventing iron and manganese build up in the system. Although it may be an inconvenience during flushing, the benefits thereafter are lasting and positive.

#### **UNIDIRECTIONAL – ZONE 1 – Wednesday May 8, 2024 and Thursday May 9, 2024**
