Summary

The Career Interest Profiler helps you find careers by mapping your interests to six basic types of personalities, together called the Holland Code. The higher you score, the more you are like that type.

What's Next

- Take a look at the traits where you received your **highest scores** and then view the related careers for those types.
- Consider your education and training aspirations.** You have to level up your skills to break into any occupation. Different careers require different certification, licenses, and degrees. These can take anywhere from a few months to over 5 years. Filter related careers by education to find careers that match your needs.
- You are unique.** Not every career that matches a personality type will be a match to your interests, skills, aspirations, or desired lifestyle. The trick is to discover the ones that do.
- Be sure to **favorite careers** that interest you to save them for later.
