AP Modern World History: Summer Reading Assignment 2024-2025

Required Reading:

Read Chapters 16-41 from *Spinning World History* by Eric Burnett. The book is a quick survey of world history in an easy-to-read narrative. You will likely find it wanting in some categories, and it is written from a secular world view, but it gives us a good snapshot of world history. In the course, we will be examining World History from 1200-2020 AD in a more detailed manner and from a Christian world view. For this course, it is required that you read **Chapters 16-41** to be prepared for the course.

Although there is no written component to this summer assignment, it is expected that you read chapters 16-41. This is a fast-paced course, so having this base narrative review beforehand will help you succeed in this course. If you choose not to read the book before courses begin, you should seriously contemplate taking regular World History because taking short-cuts in this course will result in students struggling throughout the year.
