AP United States History: Summer Reading Assignment 2024-2025

Required Reading:

Read Chapters 1,2, and 3 from the AMSCO U. S. History book (see the pdf file). This is the textbook we will be using this year. The course has a lot of material to cover, so making the time to work independently over the summer will give us an advantage this year. The PDF chapters are from an older version of the textbook that we will be using. At the start of school, you will receive an updated version of the textbook.

Although there is no written component to this summer assignment, it is expected that you fully read chapters 1-3 and that you have a base understanding of the early history of the United States. For you to succeed in this course you should complete the reading before the course begins. If you choose not to read the chapters before the course begins, you should seriously contemplate taking regular U. S. History instead because taking short-cuts in this course will result in students struggling throughout the year.
