

UPCOMING EVENTS RELATED TO STADIUM CONSTRUCTION PROJECT

3 May 2024

As the Nadderud Stadium construction project progresses, we want to keep you informed of the key upcoming events. Here's what to expect in the coming days:

Week of 6 May

- Fencing Off Construction Site: Bærum kommune will start installing fencing around the construction site from the southern end to enhance security and safety.
- Pathway Improvement Begins: The construction of a new pathway will commence to ensure safe pedestrian routes around the site.
- Introduction of New Bus Routines: We will communicate and help students understand new bus routines to ensure they are prepared for these changes.

May 13, 2024

- Bus Road Closure: The current bus road will be closed, necessitating a change in the drop-off and pick-up locations for OIS buses to Nadderudhallen.
- Traffic Circle Opens: A new traffic circle, designed to streamline vehicular flow around the school during the initial phase of construction, will be operational. This setup will help facilitate an efficient drop-off and pick-up process.
- Because IB exams run through May 17, the kommune agreed that any projects potentially causing noise will not be initiated until after that date to ensure a conducive environment for exam-takers.

A map illustrating these changes, including the new bus stop locations, is available [linked here](#).

For ongoing updates on this project, please visit [our website](#).

We appreciate the community's cooperation as we manage these developments and thank you for your understanding and flexibility.
