	Quoted Installation #44338 Bosch 20 Seer heat pump system						Applicant	Jill Sturtevant, Address:820 Four Rod Road, Phone:(860) 357-4952
	Installation of a new Bosch 20 Seer heat pump system with all new ductwork. The customer is providing the Bosch indoor air handler, Bosch outdoor heat pump, refrigeration line set, outdoor pad riser, indoor drain pan, electrical whip / disconnect and surge protector. All other required materials and labor will be provided by DMS. The indoor air handler will be installed in the attic along with a 4" air filter package. All new metal ductwork fully sealed and insulated with individual flexible duct runs to each air vent. Flexible ducts that need to cross over the attic will be strapped to the ceiling to go up and over. The ductwork design will be laid out for a 2 zone set up, 1st floor and 2nd floor. The 2nd floor will have a standard ductwork installation with supply and return ceiling mount vents for each bedroom, supply vent in bathroom and return air vent in the hallway at the top of the stairs. The1st floor will have individual ductwork drops from the attic and down through each of the closets terminating with ceiling mounted vents. We should be able to get a total of 5-6 supply air vents and a central return vent through out the 1st floor area. One of the supply ducts for the 1st floor will get routed down in the corner of the master bedroom terminating with a ceiling mounted vent in the far corner of the 1st floor living room. The exposed duct in the master bedroom will need to be framed and boxed out with new drywall, not included in the proposal and responsibility of the homeowner. The new ductwork will get Aero seal to meet local code for minimal air loss. New electrical wiring will be installed from the existing panel to the new indoor and outdoor units. Per code, we will also have a service outlet mounted near the outdoor unit as well as a service outlet and light near the indoor unit in the attic. The outdoor unit will be located near the chimney. Refrigeration piping will be installed up the side of the house and terminate into the attic. A white plastic Line Hide enclosure will be used to hide the piping and electrical on the exterior of the house. The new zoning system will include two new thermostats, zoning control panel and two motorized zone dampers. The new heat pump system will be operated by the 2 new thermostats on its own separate from the existing boiler heating system with its own thermostat.
