

Summer Work - Advanced Precalculus
Due Date: First Day of Class

Success in Advanced Precalculus and subsequently Calculus requires a solid understanding of the many basic functions you have encountered in Upper School Mathematics. In Advanced Algebra I and Algebra II you learned about functions such as linear, quadratic, rational and others. As a way to prepare for Advanced Precalculus I'd like you to create a Function Family Binder. As we navigate our way through the Advanced Precalculus curriculum you will not only use this family binder as a resource but also add to it as we learn about new functions.

Required Details

At the very minimum, your binder must contain at least one completed [handout](#) for each function family listed below and organized into a ½ inch binder. You will use the binder for your notes and handouts. Feel free to add any other features of the function that you feel are important or interesting.

Function Family Names

1. Linear $y = x$
2. Absolute Value $y = |x|$
3. Quadratic $y = x^2$
4. Cubic $y = x^3$
5. Reciprocal $y = \frac{1}{x}$
6. Constant $y = c$ (let $c=2$)
7. Square Root $y = \sqrt{x}$
8. Cube Root $y = \sqrt[3]{x}$
