

# Third Grade News

## MATH

Students reason about shapes and their attributes, with a focus on quadrilaterals. They solve problems involving the perimeter and area of shapes.

## READING

Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause effect.

## SOCIAL STUDIES

Students will analyze the impact of economic development on the natural environment by:

- Describing the relationships between human settlement and physical geography, and economic centers.
- Explaining how transportation is influenced by industrial, agricultural, and geographic factors.
- Explaining how humans have modified their environment in the development of economic centers.
- Comparing perspectives of various communities toward the natural environment.
- Drawing inferences about the positive and negative impacts of human-caused change to the physical environment.
