Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

Yes

24 P.S. §1306 facilities				
Facility Name	Facility Type	Facility Type: Other	Services Provided By	Total Students in Facility
Southwood	Resident Treatment Facility		Licensed Private Academic	55

1. Describe the host’s educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

Canon-McMillan ensures that students are educated within their least restrictive environment while at the 1306 by determining each student's LRE individually. Upon intake at Southwood RTF, designated staff from Southwood LPA will contact Canon-McMillan School District to inform them of the new student. Within three days, Southwood LPA will attempt to obtain paperwork from the Resident (Home) School District. If Southwood LPA is unable to gain necessary paperwork, they will contact Canon-McMillan Special Education Department so attempts can be made from Canon-McMillan as well. Within five days of intake, Southwood LPA will schedule an IEP meeting with necessary members of the IEP team, including Canon-McMillan LEA, to determine appropriate educational placement. While deciding on which placement would provide the student with FAPE while educating them in the LRE, the team considers Canon-McMillan public schools, out-of-district placements, and educating at Southwood LPA. Once the decision is made, Canon-McMillan LEA will complete and provide the NOREP reflecting the proposed placement. Canon-McMillan developed specific procedures that are included in a Procedural Manual which was provided to Southwood LPA to set expectations and provide consistency throughout the process. Canon-McMillan continues to monitor student progress and adjust placements if necessary to ensure a student is educated in their least restrictive environment.

2. Describe the district’s procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

As host district, Canon-McMillan's LEA schedules weekly meetings with Southwood LPA so meetings are held promptly when a student completes intake or discharge. In addition, Canon-McMillan's LEA and Special Education Secretary communicate weekly with Southwood LPA regarding students, paperwork, etc. Upon discharge, Southwood LPA communicates with the home district, sends the paperwork back, and makes a recommendation as to what type of programming works best for the student based on the most current data. Southwood LPA answers any questions that the home district may have to assist in the transition.

Incarcerated Students Oversight

1. **Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?**

No

1. **Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).**

Least Restrictive Environment

1. **Review the district's data for Least Restrictive Environment. Highlight areas of improvement.**

According to the 2022-2023 Special Education Data Report, Canon-McMillan sits at the state average percentage for Special Education students being educated inside the regular classroom 80% or more of their day, which reflects the importance that Canon-McMillan places on meaningful inclusion. Canon-McMillan's inclusion model ensures that students with disabilities will be provided with the opportunity to participate with non-disabled peers in the least restrictive environment to the maximum extent possible. Canon-McMillan is at 61.7%, while the state average is 61.6%. Conversely, Canon-McMillan is also right at the state average of 14.5% of students being placed outside of their regular classroom for some amount of their day with 14.4% of students in special education, whether that be more than 60% of the time or in an other setting which reflects the above mentioned practices. Canon-McMillan has and continues to focus on educating students in their Least Restrictive Environments.

2. **What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?**

Canon-McMillan utilizes rigorous intervention processes to help struggling learners prior to them being identified as needing special education support through RTII/Well Check at the elementary and intermediate levels and Pupil Focus at the middle and high school levels. During Pupil Focus/Well Check, school based teams have monthly meetings in each building to discuss any at-risk students that are demonstrating a need for a higher level of service than what is being provided to them currently. These students are provided additional intervention through classroom and school accommodations and are tracked over the course of time to see if the recommended accommodations benefit the student, helping them to achieve success within their current programming. The results of these focus groups is to develop individualized action plans for each student to ensure that we are doing everything possible to meet their needs within the general education setting/program. With regards to behavioral support, Canon-McMillan has fully implemented School-Wide Positive Behavior Interventions and Supports (SWPBIS) in all of our elementary schools district wide. More specifically, two of our elementary schools have been honored for sustaining Tier I supports and implementing at Tier II. A third elementary school has been honored for implementing Tier I at fidelity. To help support our schools with the implementation and sustainability of SWPBIS, Canon-McMillan brought in support through IU1 to work directly with all of our elementary buildings. The individual from IU1 worked with teams to review discipline data, set rules, and create a positive school environment. New within the past few years, Canon-McMillan created and implemented a Behavior Coaching process. This process is available for all staff within any school setting for any students, with a focus on Kindergarten through sixth grade. When the staff feel that there is a student behavior that they need consulting for or feel that they need to modify their current full classroom behavior management plan, they will put in a referral for a behavioral coach to come to their building to work directly with them. These services include observations, consultation meeting, formal recommendations, on-site coaching and informal recommendations, and fidelity checks. This has been significant in assisting our staff to learn how to better accommodate within their classrooms and has resulted in a reduction of the numbers of referrals for special education testing due to student behaviors. This year, Canon-McMillan began an intervention process to address student social/emotional needs during the pre-referral process. Canon-McMillan utilized a Student Risk Screening Scale (SRSS) as a universal screener for all students. Intervention services are offered based on the results of the screening from internalizing and externalizing behaviors. Our hopes are that we are able to meet student needs earlier on and reduce the number of students needing to be evaluated for social or emotional services.

3. **Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.**

Canon-McMillan has a wide variety of academic programming that is designed to ensure meaningful participation of students with disabilities in the general

education curriculum. We currently utilize multi-level curriculum which include both remediation and enrichment built in to allow for a variety of learning needs to be met through one curriculum. In addition, we utilize Reading Foundations at the core for all students in grades K, 1, and 2 as a multi-tiered prevention program to help to provide a solid foundation for reading and spelling. From there, if a student requires additional intervention, they may receive a double dose of Foundations, which is available in grades K-6 for those who meet the reading remediation requirements, Soudy which is available for grades 1 or above, or Wilson reading which is available for grades 2 and above. In addition, IEP teams demonstrate, through objective measures, that the general education school resources have been fully utilized, and no other supplementary aids and services are available to ensure student success in the general education environment, before considering more restrictive programming. IEP teams work together to trial any and all successful supplementary aids and services prior to determining that a student needs a more restrictive educational program. The teams consider implementing supplementary aids and services from all five domains: Modifications and Specially Designed Instruction, Related Services, Supports for School Personnel, Gifted Support Services, and Extended School Year (ESY) Services. With regards to training efforts, C-M staff are extensively trained on the above mentioned curriculum to ensure meaningful participation of students with disabilities in the general education curriculum and settings. Canon-McMillan has proudly trained all of their K-6 special education teachers and reading specialists on the Wilson Reading System. Many of these teachers not only engaged in training, but the majority completed a year-long practicum to be officially certified. In addition, uniquely, Canon-McMillan has hired a half-day Wilson Certified Trainer to provide ongoing coaching, training, support, and direct consultation to our certified Wilson Teachers. This trainer travels across the district to all K-8 buildings to provide direct support to ensure the curriculum is being implemented with fidelity. Canon-McMillan also contracts out for some professional development to train and support teachers who work with students that receive special education services. All teachers, both regular education and special education, as well as paraprofessionals and principals are offered trainings throughout the course of the school year. These trainings could be focused on various topics, which may include specially designed instruction, differentiation, co-teaching, modifications, behavioral interventions, social/emotional interventions, special education laws and regulations, crisis prevention, etc., all of which are imperative to successfully providing meaningful participation and inclusion for our students with disabilities. Through the Transition Discoveries grant-funded process, the high school also began a Big Mac Beanery in the library/media center where students from our Autistic and Life Skills Supports programs are able to gain real-life job transition skills while working with and serving the entire school population. Canon-McMillan High School students also engage in Spread the Word to End the Word - Inclusion campaign annually in efforts to reduce the stigma and promote inclusion. This campaign includes students signing a banner and also signing petitions electronically from their Chomebooks. Lastly, Canon-McMillan High School has created and implemented two partners courses that allow students in both regular education and special education to navigate the class together while learning from each other. The two partners courses include the CM store and Physical Education.

4. **Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.** Canon-McMillan provides necessary supplementary aids and services to ensure meaningful participation of students with disabilities in extra curricular activities, which includes, but is not limited to, participation in athletics, student clubs, or school sponsored activities. When the need arises, we will provide necessary aids and services to allow these students to participate in extracurricular activities which could include paraprofessional support, physical modifications when appropriate, special transportation, etc. In addition, Canon-McMillan High School has an established club called the Best Buddies Club, which is a collaborative club to promote inclusion and allow for students receiving special education services and students in general education to act in leadership roles by hosting and engaging in various in-school and out-of-school activities and outings. Canon-McMillan also participates in Special Olympics Unified Sports for both Track and Field and Bocce. These unified sports programs have been a huge success.

5. **Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?**

Students who are placed in private institution are educated with non-disabled children to the maximum extent appropriate. This is considered on an individual basis. All students who are placed in private intuitions have the opportunity to participate in the district-lead extracurricular activities. This includes opportunities to participate in all school clubs, athletics, school sponsored activities, and other extracurricular activities. Students placed in private institutions have the opportunity to attend our vocational and technical education centers as well. In addition, Canon-McMillan continually collects and reviews data to determine if there is a need to build capacity within the district programs.

6. **Discuss the district’s need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)**

Canon-McMillan continually looks for ways to build capacity and expand programs and services in an effort to provide a continuum of services, for both students educated within the district and placed outside of the district. Since the last special education plan, Canon-McMillan has created and implemented two new Autistic and Life Skills Support classrooms, one at the elementary level and one at the middle school level. The middle school program allowed for a better continuum of supports and services from the intermediate programs to the high school programs. We have also added another Therapeutic Emotional Support classroom to our elementary level. With regards to services within these programs, we have expanded upon our behavioral intervention services by adding a behavioral specialist to our staff. We schedule these individuals to provide as much continuity to our students as possible by having them follow some students from one building to the next in some instances. Next year at Canon-McMillan High School, two new courses will begin which promote inclusion and a continuum of services to bridge the gap between high school and post secondary options for our Autistic and Life Skills students. Both courses promote inclusion as they're courses that are for students with exceptionalities with regular education students acting as peer mentors. These include a C-M Store Partners course which allows the students to create products and sell them at the school store, and PE Partners which builds social skills among athletes. In addition, from an early age, we provide some education in prevocational skills beginning in elementary school that progresses to more specific transitional services at the high school level to allow students to gradually progress their skills in preparation for their life after high school. Within our district, we provide a wide range of supports and services within our specialized programming to not only increase our students who can remain in the public school setting as their LRE, but also to allow for a smoother transition from our setting to an out of district setting. Our staff and teams coordinate services and communicate with all necessary parties when a student is being placed out of the district or is coming back to the district from an outside placement. This allows the transition and continuum of services to happen more seamlessly and with as little disruption to the student as possible.

Behavior Support Policy.pdf

1. How does the district support the emotional, social needs of students with disabilities?

Canon-McMillan School District has five full-time behavior specialist consultants, two full-time mental health therapists, and three full-time social workers to help address student emotional, social, and behavioral needs throughout the district. The district contracts with outside service providers for site based mental health therapy services, provided by mental health therapists, for students receiving Therapeutic Emotional Support Services, as well as psychiatric services. In addition to providing direct services, the social workers help to connect students and families to outpatient resources within Washington County. Another outside service provider also provides on site mental health services to students outside the TES program, both receiving regular and special education, as well as psychiatric services. Our guidance department and school teams utilize a universal screener to identify students in need of social or emotional intervention and provide individual and group services accordingly. We also contract with an outside agency for behavioral consultant coaching services to assist with behavioral needs of students both receiving regular education and special education services. Collaboration with county services occurs frequently. Referrals are made to acute and partial placements if necessary.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

Canon-McMillan provides training to staff in the use of positive behavior supports, de-escalation techniques, responses to behavior that may require immediate intervention, and crisis interventions. With regards to School-Wide Positive Behavior Intervention and Supports, our schools received support with the implementation and sustainability of SWPBIS through IU1 who worked directly with all of our elementary buildings. The individual from IU1 worked with teams to review discipline data, set rules, and create a positive school environment. With regards to de-escalation techniques, we currently have two staff members trained as Certified Trainer in Crisis Prevention and Intervention (CPI). These individuals provide training to our district professional and support staff members, as well as our contracted staff. We keep diligent records of when each individual was trained so we can maintain their CPI certifications as necessary. Our staff that work directly with our specialized programs (Autistic Support, Life Skills Support and Therapeutic Emotional Support) maintain current certifications as they utilize the de-escalation techniques more frequently within their programs. This may include the principals, regular education teachers, special education teachers, paraprofessionals, and related service providers. Various other staff members and schools are trained as well. We also contract with an outside agency to provide behavioral consultant coaching support to provide behavior consultations for specific students as well as whole classrooms, as well as also provide additional on-site direct training to our teachers and support staff. They also assist in the development and implementation of individualized positive behavior support plans. Lastly, Canon-McMillan provides professional development to all staff on positive behavior support practices both school-wide and for individual classrooms. Canon-McMillan also engages with PaTTAN's Autism Initiative where ongoing consultation is provided directly to our teachers in our Autistic and Life Skills Support programs by two PaTTAN consultants. This support

assists our teachers in structuring their classroom and instruction in a way to prevent undesired behaviors from occurring, while also providing support for how to deal with behaviors that occur in these programs. We also sent our teachers in our Autistic and Life Skills programs, including SLPs and behavior specialists, as well as Special Education Administrators to a 3 day PaTTAN's intensive ABA bootcamp. We plan to send some of our principals and paraeducators to this bootcamp in the future. Our other special education teachers and paraprofessionals are also trained often on positive behavior supports and behavior intervention. These trainings are done by various individuals, which includes our contracted behavior specialists, Mental Health Therapists, and their respective agencies. Specifically, these trainings have addressed Oppositional Defiant Disorder, Passive Aggressive, Behavioral Strategies for students with Downs, Behavior Modification through Reinforcers for School and Positive Reinforcement, Behavior Modifications/Interventions through CPI Trainings, etc. Lastly, our contract with our psychiatric provider allows us to consult on an as needed basis for students who are struggling with their mental and behavioral health.

3. Describe the district positive school wide support programs.

Canon-McMillan's Behavioral Support Policy - Discipline of Students with Disabilities 113.1 states that positive rather than negative measures must form the basis of behavior support programs to ensure that all students must be free from demeaning treatment, the use of aversive techniques and the unreasonable use of restraints. The use of restraints is considered as a measure of the last resort, only to be used after less intrusive measures, including verbal de-escalation techniques. Canon-McMillan has fully implemented School-Wide Positive Behavior Interventions and Supports (SWPBIS) in all of our elementary schools district-wide. The schools each engaged in in-depth training from IU1 on appropriate implementation of School-Wide PBIS. Through SWPBIS, the schools collect detailed data regarding office discipline referrals to aide in data driven decision making. The school teams establish and utilize a tiered model for all students to determine appropriate supports necessary. A universal screener is administered district-wide to help with child find and identifying those in need of higher level supports. The use of the Team Initiated Problem Solving (TIPS) model is utilized for Tier 1 meetings. The use of the IM4 system is utilized in our elementary school that is implementing at Tier 2 with fidelity to help determine intervention programming for these higher need students. PBIS fidelity checks are completed annually to assist the schools in continuing to improve our positive school-wide behavioral practices and implementation.

4. Describe the district school-based behavior health services.

Canon-McMillan contracts out for fully-integrated behavioral support within our specialized programs, including our K-12 Autistic Support and Life Skills Support, as well as our K-6 Therapeutic Emotional Support Programs. We currently contract for five full-time behavior specialist consultants in the district. These specialists are highly trained in various areas including Crisis Prevention and Intervention, Applied Behavior Analysis, Positive Behavior Supports, etc. Canon-McMillan also employs three full-time Social Workers who work in conjunction with various team members to provide a team approach to school-based behavioral, social, and mental health services. Our therapeutic emotional support program gives students access to services provided by one of our two full-time mental health therapists, as well as our contracted psychiatrist. Our psychiatric services include monthly treatment team meetings with the school-based team and psychiatrist. The school-based team meets a at least one additional time per month or as needed depending on student mental and behavioral stability.

5. Describe the district restraint procedure.

As mentioned, the Canon-McMillan Behavior Support Policy clearly delineates that the use of restraints is considered as a measure of the last resort, only to be used after less intrusive measures, including de-escalation techniques. All necessary staff are trained in Crisis Prevention and Intervention Techniques via our certified trainers. Staff within our specialized programs maintain certification so they're always abreast with the correct processes if and when the

restraint of a student is necessary. Following every restraint, appropriate staff members document the restraint and provide it to the Canon-McMillan Special Education Department. As per state requirements, Canon-McMillan then reports all of the restraints quarterly into the state reporting system.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

The main area of concern with students who are waiting more than 30 days for an appropriate educational placement is the lack of placement options currently available for them. The waitlists for students at many placements are months out, so the team has to consider what other options there are while waiting for the appropriate placement as determined.

Special Education Personnel Development

Autism

Description of Training			
<p>Canon-McMillan will continue to hold trainings with staff in the area of Autism. Staff may include regular education teachers, special education teachers, paraprofessionals, support staff, coaches, bus drivers, etc. Whole group, small group, and individual student trainings will be held based on the need, as well as continuation of consultations/observations with direct support will take place over the course of the school year. These will be provided by Canon-McMillan staff, IU1, PaTTAN, contracted behavioral consultants through FBR, Achieving True Self, Pittsburgh Applied Behavior Analytic Therapies/Services, or other identified trainers. We will continue to monitor our students' success in our district's programs.</p>

Positive Behavior Support

Description of Training	
<p>Canon-McMillan will continue to hold trainings with staff in the area of Positive Behavior Support. These trainings would include observation, training, implementation, coaching, and monitoring of behavior support, interventions, and plans. Our district continues to implement School-Wide Positive Behavior Supports at the Elementary K-4 buildings with the direct support of the IU1 TAC who facilitates on-sight trainings for the building teams, reviews annual data, and provides consultations as needed. Along with this training, we provide ongoing training with our teachers and paraprofessionals in the area of behavior management. Behavioral trainings are conducted either as whole group, small group, or student specific based on individual needs and behavior plans. The focus of these trainings are always centered around positive behavior support, positive proactive and reactive plans, and positive reinforcement systems.</p>

Paraprofessional

Description of Training			
Canon-McMillan provides a minimum of 20 hours of training per year for all paraprofessional staff. This training ranges from modifications, accommodations, specific learning disabilities, autism, behavioral support, mental health, life skills, Crisis Prevention and Intervention, assistive technology, the science of reading, and any other topics of interest that arise over the course of the school year. These trainings are provided by a number of district teachers, administrators, contracted specialists, IU1 staff, PaTTAN, and Special Education Administration. In addition, paraprofessionals are trained on an as needed and student specific basis based on student individual needs.

Transition

Description of Training			
Canon-McMillan School District continuously evaluates our current practices in the area of transition and looks for ways to continue to improve these practices at the secondary level. Our ultimate goal is to increase the graduation rate with students who receive special education services, while alternately decreasing the drop out rate, while preparing our students for life after high school. We also continue to offer trainings and support to our special education teachers and parents to make sure that all agency supports and services are being utilized.

Science of Literacy

Description of Training			
All special education teachers teaching reading will continue to be trained in the SRA curriculum that has been adopted and purchased by the district to ensure fidelity in instruction and utilization of the direct instruction curriculum for students who need a different approach to learning basic reading skills based on their skill set. In addition, teachers will also be trained in delivering the Wilson Reading Series, Souday System, and Foundations to meet the needs of students diagnosed with dyslexia or with significant deficits in phonological awareness to improve their base with letter/sound and phonemic skills. The paraprofessionals will also be trained on the basics of Wilson and Foundations so they can assist in the carryover of skills. Lastly, parents will be trained so they have an idea of what it means to be dyslexic and also so they understand the approach to learning with this curriculum.

Parent Training

Description of Training			
Canon-McMillan provides various parent trainings to keep parents abreast of what is going on in our schools, knowledgeable on specific topics of importance, engaged with their child's school, etc. Parents are administered a parent input survey regarding trainings every few years which asks for input on topics, how to increase participation, barriers to attending, etc. Topics for these parent trainings include, but are not limited to, autism, reading skills, disability awareness, assistive technology, social emotional learning, building specific events, anxiety in school, transition, the IEP process, etc.

IEP Development

Description of Training	
Canon-McMillan trains teachers annually on updates regarding IEP development, as well as all special education paperwork. Canon-McMillan has an online procedures manual that is updated to stay current with state and federal regulations and laws.

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
