Section 1: Mission, Vision, Core Values, Theory of Action

Our Mission: Our mission is to inspire and support all students equitably to achieve their academic and social potential.

Our Vision: Park City School District is student-centered with a focus and emphasis on the whole child - Our students are safe, supported, engaged, challenged, and healthy. We continuously deliver efficient, effective, and transparent communication about the District.

Core Values:

Academic Success: We are committed to engaging all students to reach their full potential no matter where they are in their academic journeys.

Leadership: We are committed to continuous development, accountability, and transparency.

Excellent Personnel: We are committed to hiring the best and the brightest staff in a transparent and fair manner.

Communication: We are committed to communicating with all stakeholders in an open, timely, and consistent manner.

Community Alliances: We are committed to a culture of collaboration with our community partners.

Board of Education:

The Park City School District Board of Education will create conditions for student success by:

- Progress monitoring policies continuously with a focus on equitable access and outcomes for our students.
- Progress monitoring the strategic pillars on a yearly basis for actions and accomplishments.
- Informing the community in a timely manner about state and local fiscal conditions and legislative changes that may impact the district.

Academics:

Our Purpose: Park City School District's purpose is to develop the potential of every student through data-driven and best learning practices to be academically successful and prepared for life beyond graduation by providing safe, optimal and equitable learning environments for all students and staff.

The PCSD Teaching and Learning Division provides leadership, service and support in all areas of curriculum, instruction, assessment, and professional learning so that all students and educators can perform to their highest potential. Our work is focused on three areas:

1. Curriculum (what we teach)
2. Instruction (how we teach)
3. Assessment (how we know our students are learning)

Our Philosophy: The fundamental function of a school system is to educate all students to high levels through quality teaching and learning. The school system provides a process for development and expression of the talent and potential of each student with their own unique characteristics. This is accomplished through the coordinated efforts of educators, administrators, and support staff throughout the district to ensure a guaranteed and viable curriculum is in place at all schools across grade levels and content areas.

Our Beliefs: We believe that a guaranteed, viable curriculum should be:

- Collaboratively constructed to coordinate and connect instruction horizontally and vertically from Preschool through 12th grade.
- Informed by research and data with an awareness that educational experiences must be embedded in authentic activities and projects.
- Delivered at the appropriate level of challenge to ensure maximum learning for each student.
- Designed to guide teaching and learning through an instructional framework that describes expectations for lesson planning and delivery, includes scope and sequence, and defines essential student learning.

- Implemented as a personalized and continuous progression approach so that each student can achieve excellence in learning.
- An instructional process that empowers learners to own their learning.

Theory of Action: In the Park City School District, success is defined by students' academic and social growth and proficiency.

Our theory of action is:

If we . . .

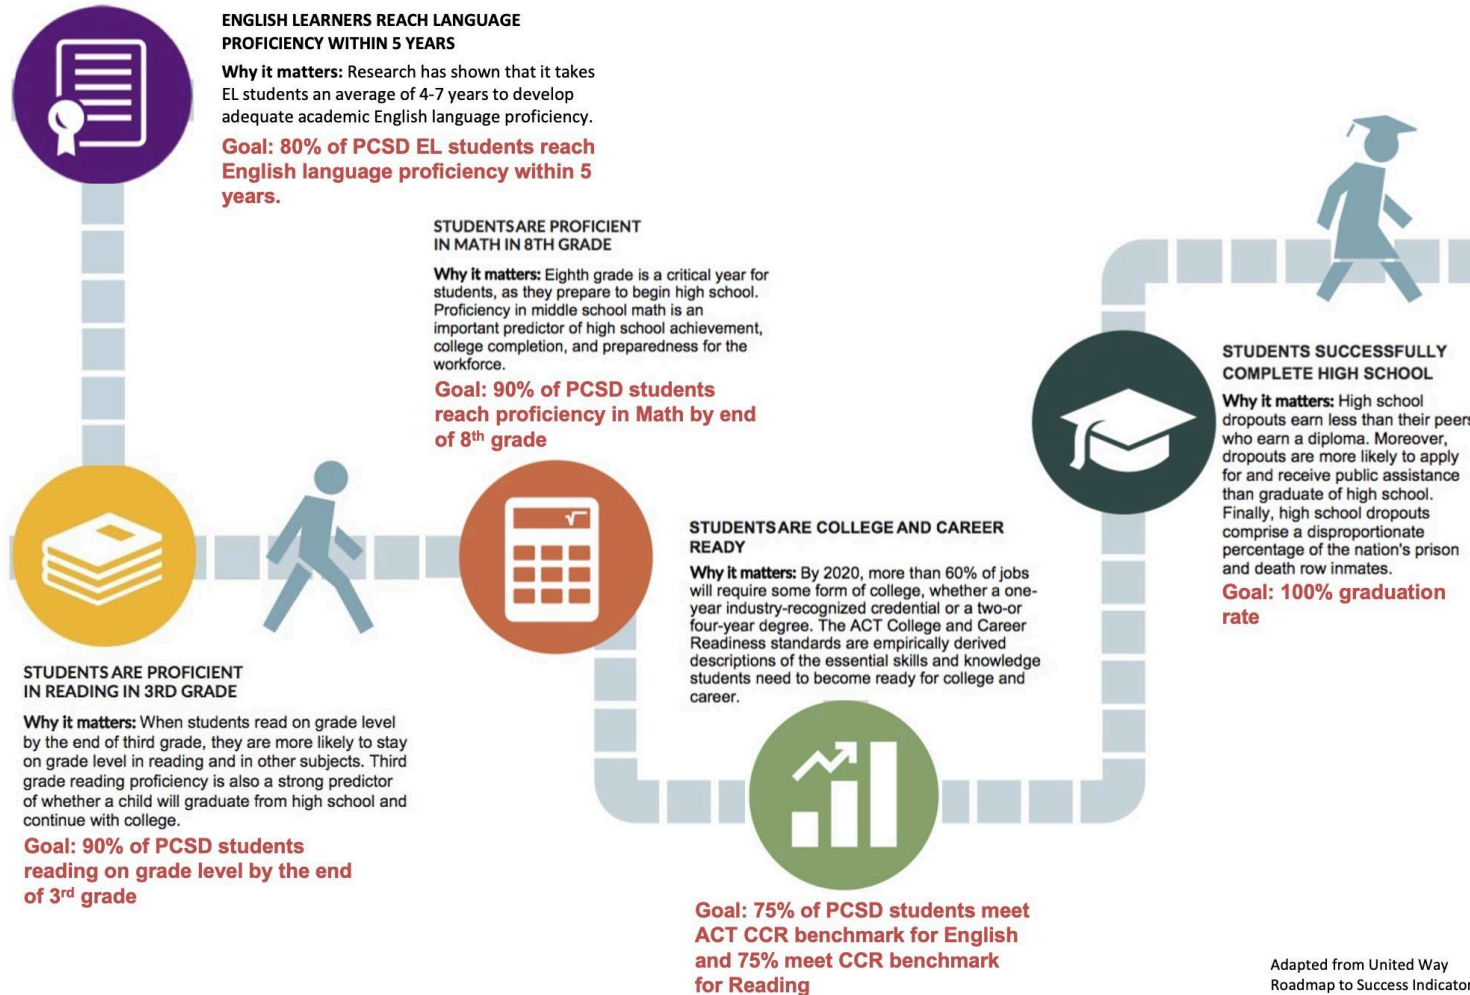

- Engage students in learning using a rigorous standards-based curriculum
- Evaluate learning based on those standards
- Analyze learning data to adjust and provide individualized support

Then all students will be equitably and effectively supported and student outcomes will improve.

As we strive to **provide safe, optimal and equitable learning environments in order to develop the potential of every student to be academically successful and prepared for life beyond graduation**, we will use the following performance measures to monitor our successful, consistent growth over the next five years to achieve:

- 80% of English Learners/Multilingual Learners (ELL/MLL) students reach language proficiency within 5 years
- 90% of 3rd grade students will reach or exceed benchmark in reading, as measured by the Reading Assessment
- 90% of 8th grade students reach proficient in math, as measured by RISE
- 75% of PCSD graduates will meet ACT college and career benchmarks for English and Reading
- Park City High School's graduation rate will be 100%

Performance Measures of Academic Success
